

Planning

Growth & Development

Delegated officer report for planning application

Application no. 141740/NMC/2024

Date registered valid: 13 December 2024

Proposal: Non-Material Change to application reference 134715/FO/2022 to allow change of parking court surfacing material from block paving to tarmac and relocation of fence boundary for plot 1

Address: Land At Sulby Street, Manchester, M40 5HY

Ward(s): Moston Ward

Applicant: Challenger Building Services Ltd & Jigsaw Homes North

Agent (if any): Mrs Hayley Knight, Hayley Knight Planning Ltd

Case officer: Steven McCoombe
Tel: 0161 234 4607
Email: steven.mccoombe@manchester.gov.uk

Recommendation: Refuse

Date of recommendation: 21 January 2025

Application details

Type of application: Non-Material Change Application

Development type: Notifications

Standard consultations:

No consultations have been printed and sent.

Neighbour notifications

No neighbour notifications have been printed and sent.

Site notice

No site notice has been produced

Press advert

No press advert had been published

Departure from Development Plan: No

Environmental Statement: Not required

Description of site/building and surroundings

The application site relates to a roughly rectangular shaped area of land situated adjacent to the terminus of Sulby Street, Moston.

The site which used to comprise a vacant and disused, single storey social club (St. Luke's) with associated area of car parking, hard standing, scrub and tree planting is now a development site, following planning permission being granted for residential redevelopment. The site is under construction.

The site is flanked to the south-west by the rear of St. Luke's church and a two storey primary school (St. Dunstan's RC Primary School) to the north and north east.

Adjoining the site to the south and western sides are existing, two storey residential properties which line Sulby Street and Lightbowne Road respectively

In terms of the site's immediate surroundings, with the exception of the aforementioned community uses, the area is largely residential in character, with properties of various architectural styles and tenures. Opposite the site access, to the other side Sulby Street, is a three-storey care home.

A short distance to the south, at the junction of Lightbowne Road and Oscar Street are a small number of local shops and amenities.

Listed building: Not applicable

Conservation area: No

Tree Preservation Order: No

Description of development

Non-material amendments are sought to planning permission referenced 134715/FO/2022 which allowed for the erection of 8 dwellinghouses and 12 apartments (Use Class C3) with associated car parking landscaping and access following demolition of existing structure.

The development incorporates an individual car parking space to the each of the dwellinghouses and a communal car park to the rear of the apartment block.

In this case, it is sought to replace the agreed hardstanding for the car park area associated with the apartments from block paving to tarmac.

It is also proposed to erect a fence to the side of Plot 1 (dwellinghouse) to bring the area within the demise of plot 1, rather than the public domain. The fence type would remain the same as approved. The intention is to allow proper management of the area to prevent against any potential anti-social behaviour.

Consultations & Notification Responses

None Required

Planning History

134715/FO/2022

Erection of 8 dwellinghouses and 12 apartments (Use Class C3) with associated car parking landscaping and access following demolition of existing structure. *Approved 23 November 2022.*

Policy

Local Development Framework

The principal document within the framework is the Manchester Core Strategy which sets out the spatial vision for the City and includes strategic policies for development during the period 2012 – 2027.

'The Core Strategy Development Plan Document 2012 -2027 ("the Core Strategy") was adopted by the City Council on 11th July 2012. It is the key document in Manchester's Local Development Framework. The Core Strategy replaces significant elements of the Unitary Development Plan (UDP) as the document that sets out the long term strategic planning policies for Manchester's future development.

A number of UDP policies have also been saved until replaced by further development plan documents to accompany the Core Strategy. Planning applications in Manchester must therefore be decided in accordance with the Core Strategy, saved UDP policies and other Local Development Documents.'

The following policies within the Core Strategy are considered relevant:

Policy SP1 (Spatial Principle) refers to the key spatial principles which will guide the strategic development of Manchester together with core development principles. It is stated that developments in all parts of the city should create well designed places which enhance or create character, make a positive contribution to the health, safety and well-being of residents,

consider the needs of all members of the community and protect and enhance the built environment. Further, development should seek to minimise emissions, ensure the efficient use of natural resources, reuse previously developed land wherever possible, improve access to jobs, services and open space and provide good access to sustainable transport provision.

Policy DM1 (Development Management) states that new development should have regard to more specific issues for which more detailed guidance may be given within supplementary planning documents. Issues include: the appropriate siting and appearance of development, the impact upon the surrounding area, the effects on amenity, accessibility, community safety and crime prevention, health, the adequacy of internal accommodation and amenity space and refuse storage/collection.

Policy H1 (Overall Housing Provision) states that the proportionate distribution of new housing, and the mix within each area, will depend on a number of factors. New housing will be predominantly in the North, East, City Centre and Central Manchester, these areas falling within the Regional Centre and Inner Areas of Manchester.

The policy goes on to state that that new residential development should take account of the need to:

- Contribute to creating mixed communities by providing house types to meet the needs of a diverse and growing Manchester population;
- Reflect the spatial distribution set out above which supports growth on previously developed sites in sustainable locations and which takes account of the availability of developable sites in these areas;
- Contribute to the design principles of Manchester LDF including in environmental terms. The design and density of a scheme should contribute to the character of the local area. All proposals should make provision for appropriate usable amenity space. schemes should make provision for parking cars and bicycles (in line with policy T2) and the need for appropriate sound insulation;
- Prioritise sites which are in close proximity to centres of high frequency public transport routes;
- Be designed to give privacy to both its residents and neighbours.

Policy H2 (Strategic Housing Location) states that the key location for new residential development throughout the plan period will be within the area to the east and north of Manchester City Centre identified as a strategic location for new housing. Land assembly will be supported in this area to encourage the creation of large development sites or clusters of sites providing the potential for significant regeneration benefits.

Developers should take advantage of these opportunities by:-

- Diversifying the housing offer with particular emphasis on providing medium density (40-50 dwellings per hectare) family housing including affordable housing. In locations which are close to the City Centre, such as the Lower Irk Valley and Holt Town, higher densities will be appropriate. However, the provision of family homes should remain an emphasis in these areas, too.
- Including environmental improvements across the area.
- Creating sustainable neighbourhoods which include complementary facilities and services.
- Considering the scope to include a residential element as part of employment-led development.

The proposal will comply with the densities identified within this policy and bring about significant regeneration in an area identified for change.

Policy H3 (North Manchester) – relates to new housing in north Manchester and states that over the lifetime of the Core Strategy, north Manchester will accommodate around 20% of new residential development. Priority will be given to family housing and other high value, high quality development where this can be sustained. High density housing will be permitted within or adjacent to the parts of North Manchester that fall within the Regional Centre (Strangeways and Collyhurst area) and within Cheetham Hill and Harpurhey district centres as part of mixed use schemes, as well as along high frequency public transport routes.

Policy T2 (Accessible Areas of Opportunity and Need) states that the Council will actively manage the pattern of development to ensure that new development: is located to ensure good access to the City's main economic drivers, including the Regional Centre, the Oxford Road Universities and Hospitals and the Airport and to ensure good national and international connections. Is easily accessible by walking, cycling and public transport; connecting residents to jobs, centres, health, leisure, open space and educational opportunities.

Policy EN1 (Design Principles and Strategic Character Areas) - All development in Manchester will be expected to follow the seven principles of urban design, as identified in national planning guidance and listed above and have regard to the strategic character area in which the development is located. Opportunities for good design to enhance the overall image of the City should be fully realised, particularly on major radial and orbital road and rail routes.

Policy EN3 (Heritage) – states that the Council will encourage development that complements and takes advantage of the distinct historic and heritage features of its districts and neighbourhoods, including those of the City Centre. New developments must be designed so as to support the Council in preserving or, where possible, enhancing the historic environment, the character, setting and accessibility of areas and buildings of acknowledged importance, including scheduled ancient monuments, listed buildings, registered parks and gardens, conservation areas and archaeological remains.

Policy EN4 (Reducing CO₂ Emissions by Enabling Low and Zero Carbon Development) concerns reducing CO₂ emissions and states that where possible, new development and retrofit projects must be located and designed in a manner that allows advantage to be taken of opportunities for low and zero carbon energy supplies. The use of building materials with low embodied carbon in new development and refurbishment schemes is also sought.

Policy EN9 (Green Infrastructure) - New development will be expected to maintain existing green infrastructure in terms of its quantity, quality and multiple function. Where the opportunity arises and in with current Green Infrastructure Strategies the Council will encourage developers to enhance the quality and quantity of green infrastructure, improve the performance of its functions and create and improve linkages to and between areas of green infrastructure. Where the benefits of a proposed development are considered to outweigh the loss of an existing element of green infrastructure, the developer will be required to demonstrate how this loss will be mitigated in terms of quantity, quality, function and future management.

Policy EN14 (Flood Risk) – refers to flood risk and amongst other issues states that all new development should minimise surface water run-off, including through Sustainable Drainage Systems (SUDS) and the appropriate use of green infrastructure.

Policy EN16 (Air Quality) – states that the Council will seek to improve the air quality within Manchester, and particularly within Air Quality Management Areas, located along Manchester's

principal traffic routes. Developers will be expected to take measures to minimise and mitigate the local impact of emissions from traffic generated by the development, as well as emissions created by the use of the development itself.

Policy EN17 (Water Quality) states that developments should minimise surface water run-off and minimise ground contamination into the watercourse construction.

Policy EN18 (Contaminated Land and Ground Stability) - The Council will give priority for the remediation of contaminated land to strategic locations as identified within this document. Any proposal for development of contaminated land must be accompanied by a health risk assessment.

Policy EN19 (Waste) states that the Council will require all developers to demonstrate the proposals consistency with the principles of the waste hierarchy (prevention, reduction, re-use, recycling, energy recovery, and disposal). Developers will be required to submit a waste management plan to demonstrate how construction and demolition waste will be minimised and recycled.

Unitary Development Plan for the City of Manchester, 1995 (Saved Policies)

The below saved policies of the Unitary Development Plan are also considered relevant:

Policy DC7.1 (New Housing Development) state that the Council will negotiate with developers to ensure that new housing is accessible at ground floor level to disable people, including those that use wheelchairs wherever this is practicable.

Policy DC26 (Noise) states that the Council intends to use the development control process to reduce the impact of noise on people living and working in the City. In particular, consideration will be given to the effect of new development proposals which are likely to be generators of noise.

The Guide to Development in Manchester (SPD) (2007)

The Guide to Development in Manchester is a supplementary planning document which contains core principles to guide developers. The document offers design advice and sets out the City Council's aspirations and vision for future development and contains core principles to guide developers to produce high quality and inclusive design. The principles that development should seek to achieve, include, character and context, continuity, and enclosure, ease of movement, quality of the public realm, diversity, legibility and adaptability.

Manchester Residential Quality Guidance (2016)

The City Council's Executive has endorsed the Manchester Residential Quality Guidance. As such, the document is now a material planning consideration in the determination of planning applications and weight should be given to this document in decision making.

The purpose of the document is to outline the consideration, qualities and opportunities that will help to deliver high quality residential development as part of successful and sustainable neighbourhoods across Manchester. Above all the guidance seeks to ensure that Manchester can become a City of high quality residential neighbourhood and a place for everyone to live.

The document outlines nine components that combine to deliver high quality residential development, and through safe, inviting neighbourhoods where people want to live. These nine components are as follows:

Make it Manchester;
Make it bring people together;
Make it animate street and spaces;
Make it easy to get around;
Make it work with the landscape;
Make it practical;
Make it future proof;
Make it a home; and
Make it happen.

The Manchester Green and Blue Infrastructure Strategy (G&BIS)

The G&BIS sets out objectives for environmental improvements within the City in relation to key objectives for growth and development. Building on the investment to date in the city's green infrastructure and the understanding of its importance in helping to create a successful city, the vision for green and blue infrastructure in Manchester over the next 10 years is: By 2025 high quality, well maintained green and blue spaces will be an integral part of all neighbourhoods. The city's communities will be living healthy, fulfilled lives, enjoying access to parks and greenspaces and safe green routes for walking, cycling and exercise throughout the city. Businesses will be investing in areas with a high environmental quality and attractive surroundings, enjoying access to a healthy, talented workforce. New funding models will be in place, ensuring progress achieved by 2025 can be sustained and provide the platform for ongoing investment in the years to follow.

Four objectives have been established to enable the vision to be achieved:

1. Improve the quality and function of existing green and blue infrastructure, to maximise the benefits it delivers
2. Use appropriate green and blue infrastructure as a key component of new developments to help create successful neighbourhoods and support the city's growth
3. Improve connectivity and accessibility to green and blue infrastructure within the city and beyond
4. Improve and promote a wider understanding and awareness of the benefits that green and blue infrastructure provides to residents, the economy and the local environment.

Places for Everyone Greater Manchester Joint Development Plan

The draft version of the Places for Everyone Joint Development Plan was published in August 2021 and has been produced by Greater Manchester Combined Authority to provide a long-term plan for jobs, new homes, and sustainable growth for nine of Greater Manchester's districts. Once the Places for Everyone Plan is adopted it will form part of Manchester's development plan. As this plan is at an advanced stage it would now be considered as a material consideration for planning applications.

National Planning Policy Framework

The central theme to the revised NPPF is to achieve sustainable development. The Government states that there are three dimensions to sustainable development: an economic role, a social role and an environmental role.

The Framework underlines a "presumption in favour of sustainable development". This means approving development, without delay, where it accords with the development plan and where the development is absent or relevant policies are out-of-date, to grant planning permission

unless any adverse impacts of doing so would significantly and demonstrably outweigh the benefits when assessed against the NPPF.

Sections 4, 5, 11 and 12 are considered relevant to the consideration of this application.

National Planning Policy Guidance

The Government produced a suite of documents to act as a live resource which set out advice and best practice on a wide range of planning issues following a detailed review of planning policy guidance as a way of streamlining policy.

The relevant sections of the NPPG in this case are as follows:

Noise - Local planning authorities' should take account of the acoustic environment and in doing so consider:

- whether or not a significant adverse effect is occurring or likely to occur;
- whether or not an adverse effect is occurring or likely to occur; and
- whether or not a good standard of amenity can be achieved.

Mitigating the noise impacts of a development will depend on the type of development being considered and the character of the proposed location. In general, for noise making developments, there are four broad types of mitigation:

- engineering: reducing the noise generated at source and/or containing the noise generated;
- layout: where possible, optimising the distance between the source and noise-sensitive receptors and/or incorporating good design to minimise noise transmission through the use of screening by natural or purpose-built barriers, or other buildings;
- using planning conditions/obligations to restrict activities allowed on the site at certain times and/or specifying permissible noise levels differentiating as appropriate between different times of day, such as evenings and late at night, and;
- mitigating the impact on areas likely to be affected by noise including through noise insulation when the impact is on a building.

Design states that where appropriate the following should be considered:

- layout – the way in which buildings and spaces relate to each other;
- form – the shape of buildings;
- scale – the size of buildings;
- detailing – the important smaller elements of building and spaces;
- materials – what a building is made from.

Air Quality – Guidance states that when air quality is considered relevant to a planning application, which includes when proposals:

- Give rise to potentially significant impact (such as dust) during construction for nearby sensitive locations;
- Significantly affect traffic in the immediate vicinity of the proposed development site or further afield; or
- Expose people to existing sources of air pollutants. This could be by building new homes, workplaces or other development in places with poor quality.

Issues

Principle

Section 96A of the 1990 Act (as inserted on 1st October 2009 by S.90 of the Planning Act 2008) allows a Local Planning uthority in England to make a change to any planning permission relating to land in its area if it is satisfied that the change is not material. In deciding whether a change is material, the authority must have regard to the effect of the change, together with any previous non-material changes, on the planning permission as originally granted.

In this case, it is considered that the change to the surface to the parking area would appear visually different to that approved and would undermine visual amenity. The effect on surface water drainage is also unclear and would need to be properly assessed.

The change to the fencing is considered acceptable.

On the basis of the impact to visual amenity and surface water drainage, the proposed amendment is considered material and should not be dealt with via the non-material amendment procedure.

Materiality

It is believed that the change of the car park surface to the apartments from block paving to tarmac represents a visually inferior finish and would undermine the visual amenity and the general character of the area. In that respect, the change is considered visually distinct and therefore represents a material change.

There is also concern that as tarmac is generally impermeable this would impact upon the agreed surface water drainage scheme. Any change to the surface would require re-assessment of the drainage scheme which does not form part of this application.

In light of the above, the proposed change to the hard landscaping is not considered non-material.

Other Legislative Requirements

Equality Act 2010

Section 149 (Public Sector Equality Duty) of the Equality Act 2010 requires due regard to the need to: Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act and; Advance equality of opportunity between persons who share a protected characteristic and persons who do not share it. The Equality Duty does not impose a legal requirement to conduct an Equality Impact Assessment. Compliance with the Equality Duty involves consciously thinking about the aims of the Equality Duty as part of the process of decision-making.

Human Rights Act 1998 considerations

This application needs to be considered against the provisions of the Human Rights Act 1998. Under Article 6, the applicants (and those third parties, including local residents, who have made representations) have a right to a fair hearing and to this end the local planning authority must give full consideration to their comments.

Protocol 1 Article 1, and Article 8 where appropriate, confer(s) a right of respect for a person's home, other land and business assets. In taking account of all material considerations, including Council policy as set out in the Core Strategy and saved policies of the Unitary Development Plan, the Director of Planning, Building Control & Licensing has concluded that some rights conferred by these articles on the applicant(s)/objector(s)/resident(s) and other occupiers and owners of nearby land that might be affected may be interfered with but that that interference is in accordance with the law and justified by being in the public interest and on the basis of the planning merits of the development proposal. She believes that any restriction on these rights posed by the recommendation given is proportionate to the wider benefits of and that such a decision falls within the margin of discretion afforded to the Council under the Town and Country Planning Acts.

Recommendation: Refuse

Condition(s) to be attached to decision for approval OR Reasons for recommendation to refuse

1) The proposed amendments relate to a change in the hard landscaping material for the apartment parking forecourt from block paving to tarmac and the relocation of the fence along the side boundary of plot 1 to become part of the garden for Plot 1.

2) Following an assessment of the details and drawing submitted, it is confirmed that part of the proposed amendments sought is considered a material change.

The City Council is not satisfied that the proposed changes to the surface material for the parking can be considered non-material and would appear different, having a detectable impact to visual amenity. The material change would also impact upon the surface water drainage proposal, agreed as part of condition 10 of the host planning permission.

As such the proposal cannot be determined as non-material under section 96A of the Town and Country Planning Act 1990.
