

Key:

- Woodstone Build-in
Swift Nest Box x6
- Vivara Pro Build-in
Woodstone Bat Box x4

Notes

Bat boxes are to be installed at the highest possible points (minimum 4m from ground level). All boxes are to be located to face south to south-east to allow the box to be warmed by the sun. They should not be placed where the flight path would be blocked by obstructions or vegetation and should be placed in sheltered locations.

Swift boxes should be placed between 3 and 5m above ground. These should be installed onto the proposed building under the building eaves, and positioned between north and east to avoid strong sunlight and high winds.

Boxes of similar specifications but different brands may be used.
