Local Benefit Proposal end uses

To whom it might concern,

Swissport is a ground handling company who provide services to Airlines around the world, including passenger check-in, fuelling, baggage handling, cargo handling, cleaning, lounges and ramp handling.

We will be the sole tenant of this new development and are moving from an existing facility that is to be demolished in line with the planned expansion works for Manchester Airport.

This move will allow Swissport to grow along with Manchester Airport as the utilisation of the existing facility is at capacity.

All recruitment is advertised locally on a variety of job boards, we attend local job fairs and advertise for applicants through the Swissport website. A full training package is delivered by Swissport to ensure all employees are trained in the appropriate skills required for their role.

This new facility is being designed for our Cargo Handling operation who currently employ 92 staff, 95% of our existing employees currently live in the Manchester/Greater Manchester area and will be moved into the new facility once operational.

Sincerely yours,

Ion Bugarin
Manager Global Operations - Cargo
