Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. View government planning guidance on fire statements or access the fire statement template and guidance.
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or view government planning guidance on determination periods.

Description

Please describe details of the proposed development or works including any change of use

Property is within a selective licencing area - my proposal is to allow the property to house not only famillies but also occupants of different households
I.E change of use of the property to a Class C4 HMO

Due to the proximity to places fo work for professionals and universities for students . As such, it offers an ideal setting for living for diverse arrangements that can benefit both the residents and the area. Please see below as to why it could be advantageous:

Increased Demand and Occupancy Rates: The proximity to universities means there is a high demand for housing among students, faculty, and staff. Many of these individuals prefer shared housing arrangements due to financial considerations and the desire for a supportive living environment. Allowing multiple households can lead to higher occupancy rates and reduce the risk of vacancies.

Community Building: By accommodating multiple households, the property can become a more inclusive and vibrant community. Families, students, and professionals can interact, share experiences, and support each other. and enhance the sense of community.

Economic Benefits for Residents: Shared housing arrangements often provide a more affordable option for residents, particularly students and young professionals who might otherwise struggle to find suitable accommodations. This can lead to higher tenant satisfaction and longer-term leases as residents are more likely to stay in a financially viable living situation.

Adaptability to Changing Demographics: The housing needs in professional and university areas are continuously evolving. By allowing multiple households, the property can better adapt to these changes, ensuring that it remains a desirable place to live for a broad spectrum of residents.

Historical Precedent and Professional Potential: It is worth noting that this property was previously let on a company let basis for a sporting team , demonstrating its potential to house professionals, office workers, and students. This history indicates that the property is well-suited for a diverse range of tenants and can effectively support multiple households, providing a practical and efficient housing solution.

Given these points, I kindly request that you consider revising the current policy to permit multiple households within your property. Such a change would not only benefit the tenants by providing more flexible and affordable housing options but also enhance the property's appeal and occupancy rates.

I would be happy to discuss this proposal further and address any concerns you may have.

Thank you for considering this request, and I look forward to your positive response.

Supporting information requirements

Where a development proposal is likely to affect features of biodiversity or geological conservation interest, you will need to submit, with the application, sufficient information and assessments to allow the local planning authority to determine the proposal.

Failure to submit all information required will result in your application being deemed invalid. It will not be considered valid until all information required by the local planning authority has been submitted.

Your local planning authority will be able to advise on the content of any assessments that may be required.

Biodiversity net gain

Biodiversity net gain is a legal requirement for planning permission introduced on 12 February 2024. All applications are required to either provide detailed information proving there will be a biodiversity increase; or explain why the requirement does not apply to the development.

Find out more about biodiversity net gain, and access digital tools from our partners that can help determine if you are exempt, or produce the biodiversity metric information required.

Do you believe that, if the development is granted permission, the general Biodiversity Gain Condition (as set out in Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 (as amended)) would apply?

◯ Yes
⊘ No

Biodiversity net gain has been introduced as a general condition for planning permission. As set out in The Environment Act 2021: "grants of planning permission in England [are] to be subject to a condition to secure that the biodiversity gain objective is met". Therefore, in England, all planning permissions are generally subject to biodiversity gain rules, unless they are specifically exempt or out of scope.

If you have stated that the biodiversity net gain requirement does not apply to your application you must provide the reason(s) why, and may also need to supply evidence (especially where you believe the application is eligible for the 'de minimis' exemption).

You can use our partner's free online tool to determine if you are exempt and to produce detailed reasons

Please add all the reasons why biodiversity net gain does not apply and enter a justification for each one

Reason biodiversity net gain does not apply:
Self-build and custom build development

Are you building more than nine houses?:
No

Is the total size over 0.5 hectares?:
No

Do all buildings meet the definition of self-build or custom housebuilding as set out in section 1(A1) of the Self-build and Custom Housebuilding Act 2015?:
Yes

Does your Local Planning Authority require applicants for self-build and custom-build development to evidence their eligibility?:
Yes

Please justify the reason why biodiversity net gain does not apply:
change of license - no actual manual work to be carried out

Note: Please read the help text for further information why developments may be exempt or not in scope.

Authority Employee/Member

With respect to the Authority, is the applicant and/or agent one of the following:
(a) a member of staff
(b) an elected member
(c) related to a member of staff
(d) related to an elected member

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.

Do any of the above statements apply?
