RE: ROLLER SHUTTERS SECURITY MINIMUM PERFORMANCE STANDARDS

The Watches of Switzerland Group delivers and operates its showrooms, across the Country, to a minimum security performance design standard that is industry recognised, and a specific operational requirement of its insurers.

With specific reference to Roller shutters, the shutters installed should have an RC3 rating, as certified by the Loss Prevention Council.

The shutters proposed for Mansfield Chambers meet this minimum performance specification, and are the same specification as installed at the various other locations operated by the Watches of Switzerland Group in St Ann's Square Manchester, as listed below:

Watches of Switzerland
Mappin and Webb
Tag Heuer

Should you have any queries or concerns with regards to the above, then please do not hesitate to contact us.

Yours sincerely

MARTIN LEE
Senior Programme Manager
