
PROJECT	Blossom Market
PROJECT REF.	2062
DATE FIRST ISSUED	NYI
REVISION	-

In relation to transport and servicing arrangements for the proposed Blossom Market, it is envisaged that this development will cause a decrease in vehicular movement through the change of use from a garage to market. Visitors to the market will mostly arrive on foot, as is common with other similar developments within the Ancoats area. Any deliveries, servicing and collections, including waste collection will be undertaken outside of operational hours and peak AM and PM times.

The development is level access and has a singular route which connects Henry Street and Gun Street. Management of the building, including occupancy levels will be overseen by the building manager.
