John,

161 Palatine Road Manchester M20 2GH - 141083/TCA/2024

The applicant has proposed to carry out the following works:

Removal of giant pear tree obscuring light and overwhelming the garden

I have lived in this house for seven years and truly appreciate how gorgeous this area is. I love my garden and all the greenery however I have a very large pear tree which is growing very close to my patio and balcony. I have tried to live with it however it takes up so much light, the leaf fall is distressing to my lawn and it is ungainly. It's extremely high and I worry about it. It would give me a chance to plant a number of replacement shrubs more endearing and attractive in keeping with the area if I were permitted to remove it.

Whilst I do not agree with the being overbearing for this setting, This tree would not be worthy of TPO status due to its position in the rear garden and therefore we would be unable to object to this proposal.

Kind regards

Rudi Farghaly
