

Key:

- Vivara Pro Build-in Woodstone Bat Box
- Schwegler 1SP Sparrow Terrace
- Swift Next Box
- 2F Schwegler Bat Box (in tree)

Notes:

Bat boxes are to be installed at the highest possible points (minimum 4 m from ground level). All boxes are to be located to face south to south-east to allow the box to be warmed by the sun. They should not be placed where the flight path would be blocked by obstructions or vegetation and should be placed in sheltered locations.

Sparrow boxes are to be installed at the highest points (minimum 2 m from ground level). They are to be located to face between north and east to avoid strong sunlight and high winds. They should not be placed where the flight path would be blocked by obstructions or vegetation.

Swift boxes should be placed between 3 and 5m above the ground. These should be installed onto the proposed building under the building eaves and positioned between north and east to avoid strong sunlight and high winds.

Boxes of similar specification but different brands may be used.
