Dear Chris Brennan, Jonathan Brennan

As per our letter of the June 2023, I can restate, due to the very low and decreasing levels of participation over the last number of years we took the decision to sell the bowling green land. As previously stated, the club has come under serious financial difficulty in recent years also the pandemic has played a large part in the process. After several meetings, the members voted, in early 2023, to sell the Bowling Green.

To give the club a chance it was agreed by all members to sell this asset off as this would make the club financially stable and keep the club open for the community.

Faced with declining numbers, the sale of the land will ensure the wider club can keep going. The club was losing on average per week £400/£500 and the rising current costs this was crippling the club.

Bowls is no longer viable on-site. This position is accepted by the bowlers, a number of the bowling club members already play at Burnage Village and the club is supportive of the remaining players moving to Burnage Village and to Beech House, ensuring bowls in the area is maintained in a sustainable way.

Kind Regards

Management and Bowling Committee

Longsight Cricket Club
