Re: Proposed Development of Tubing Experience at Zip World Manchester (Heaton Park)

Dear Sir/ Madam,

We are excited to propose a new adventure activity within Zip World's current operational site in Heaton Park. The development will create a tubing experience catering to families and thrill-seekers, attracting approximately 25,000 visitors annually. This activity will operate alongside our existing attractions (tree top nets, full trek, and mini trek) without requiring new administration or support facilities.

Participants will check in at the reception, receive a briefing and equipment in the "Dutch barn," and then proceed to the ride's starting platform. The ride features three slide routes utilizing the natural topography to ensure an exhilarating gravity-fuelled experience complemented by a mechanical uplift to return participants to the starting platform. The structure is designed to minimize environmental impact, preserving mature trees and enhancing the site's biodiversity by removing invasive species.

We would welcome the opportunity to present this development proposal to the Planning Authority in more detail. We believe that a face-to-face presentation would allow us to address any questions or concerns you may have and demonstrate the benefits this project will bring to the local area.

Thank you for considering our proposal. We look forward to working together to bring this exciting new attraction to life.

Yours faithfully,

Rhodri Owen - Head of Projects
Ellen Gould – Project Manager
