Dear Jack

T2 Union- Application for Discharge of Conditions (Planning Permission Ref: 132952/JO/2022)

On behalf of our client, Union Living Manchester 1 Ltd, please find enclosed an application for the discharge of multiple conditions attached to planning permission ref: 132952/JO/2022, relating to the Union T2, Water Street development in Manchester City Centre.

Planning permission reference 126648/FO/2020 was approved in November 2021 for:

“Full Planning Permission for the erection of 36 storey plus basement level mixed use building comprising co-living units, amenity space and flexible commercial space (Sui Generis), co-work (Use Class B1), landscaping, access and other associated works.”

This planning permission was then subject to a Section 73 Variation of Condition application (planning permission reference 132952/JO/2022) with the following description of development:

“Variation of Condition 2 (Approved Drawings and Documents, including amendments to design details of ground floor to provide for food and drink use), Condition 5 (Soft Landscaping) and Condition 8 (CMP)”

It is this amended planning permission that is being built out and this application is therefore seeking to discharge conditions attached to this permission. The information being submitted with this letter to discharge the relevant planning conditions is detailed below.

Condition Discharge

Condition 7- Paving and Surfacing strategy

Condition 7 attached to the planning permission is worded as follows:

Deloitte LLP is a limited liability partnership registered in England and Wales with registered number OC303675 and its registered office at 1 New Street Square, London, EC4A 3HQ, United Kingdom.

Deloitte LLP is the United Kingdom affiliate of Deloitte NSE LLP, a member firm of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee (“DTTL”). DTTL and each of its member firms are legally separate and independent entities. DTTL and Deloitte NSE LLP do not provide services to clients. Please see www.deloitte.com/about to learn more about our global network of member firms.

Before the development hereby approved is completed, a paving and surfacing strategy for the public footpaths, vehicular crossings, and vehicular carriageways within and around the site, including Water Street, shall be submitted to and approved in writing by the City Council as local planning authority. All works approved in discharge of this condition shall be fully completed before the development hereby approved is first occupied.

To seek the discharge of condition 7, Exterior Architecture has prepared a General Arrangement Plan which shows the paving and surfacing strategy for the development. It includes details on the proposed hard landscape and soft landscape, such as the location of different paving, retaining wall, railing, trees and shrubs in and around the Site.

This is in line with the S.278 agreement that has been undertaken in relation to the public highway and surrounding pavements. The details set out in the plan therefore addresses requirements of the Condition 7.

Condition 17a- Plant acoustics

Condition 17a attached to the planning permission is worded as follows:

a) Externally mounted ancillary plant, equipment and servicing shall be selected and/or acoustically treated in accordance with a scheme designed so as to achieve a rating level of 5dB (LAeq) below the typical background (LA90) level at the nearest noise sensitive location.

The scheme shall be submitted to and approved in writing by the City Council as local planning authority, prior to installation, in order to secure a reduction in the level of noise emanating from the site.

External plant shall not be brought into use until an emergency plant noise testing schedule has been submitted to, and approved in writing by, the City Council, as local planning authority.

To seek the discharge of condition 17a, Fisher Acoustics has completed an acoustic assessment of the external building services plant.

It includes details of the study undertaken to determine pre-existing daytime and nighttime noise levels. It is recommended that noise levels at any residential façade during operation of emergency plant does not exceed daytime noise level limits. The report also includes an emergency plant noise testing schedule concludes that the worst-case calculated noise levels due to emergency plant do not exceed the applicable noise limits.

The details set out in the acoustic assessment therefore address requirements of Condition 17a. Part b) of Condition 17 required verification of the above study once the building is complete and operational, which will be discharged once the building finishes construction in H1 2025.

Submission Summary

The following table summarises the condition to be discharged, and the information submitted pursuant to the discharge of the condition:

Table 1

Condition Number	Full or Partial Discharge	Information Submitted
Condition 7- Paving and Surfacing strategy	Full Discharge	Tower 2 General Arrangement Plan titled 'T2-EXA-G710-PL-XX-00100'
Condition 17a- Plant acoustics	Partial Discharge	Acoustic Assessment titled 'External Plant Acoustic Assessment - Planning Condition 17'

This application comprises this covering letter the information set out in Table 1 and the Condition Discharge Application Form. A fee of £215 (including service fee of £70) has been submitted with this application. The application reference number is PP-13590738.

We request the Local Planning Authority's written consent that the enclosed information is sufficient to allow the full discharge of the conditions outlined above. If you have any queries regarding this submission, please do not hesitate to contact me or my colleague Michael Percival (mipercival@deloitte.co.uk/ +44 161 455 6672)

Yours sincerely

Deloitte LLP
