

General Waste - **4 x 240L wheeled bins Total estimated volume:** 900L (60% of 1500L)

Dry recycling (include material type details) - **2 x 240L wheeled bins Total estimated volume:** 375L (25% of 1500L) **Materials included:** Paper and mixed recycling (metal and plastic)

Food Waste - **1 x 240L wheeled bin Total estimated volume:** 225L (15% of 1500L)

Industrial Waste - N/A

Other - **1 x 120L sealed and leak-proof used oil container Total estimated volume:** 60L Disposal will be handled by a licensed waste carrier in compliance with all relevant regulations.

Internal storage:

Location:

- A designated waste storage area is located at the rear of the premises.
- This space is indoors, ensuring compliance with regulations requiring waste to be stored internally until collection.

Capacity and Bins:

- The estimated weekly waste generation is 1500L.
- The internal storage will accommodate 7 x 240L wheeled bins to segregate general waste, recycling, and any food-related waste.

Segregation of Waste:

- Bins will be clearly labeled for general waste, recyclables, and food waste to ensure proper segregation at the source.
- Staff will be trained to follow waste segregation protocols.

Ventilation - Hygiene

Ventilation:

The waste storage area will be equipped with a mechanical ventilation system to maintain air circulation and minimize odors. Ventilation will be directed to avoid any impact on occupied or neighboring areas.

Hygiene Measures:

The storage area will feature sealed, non-porous floors and washable walls to facilitate cleaning and maintain hygiene. All bins will have fitted lids to contain waste securely and control odors.

Cleaning Proposals:

The waste storage area will be cleaned regularly, at least twice a week or more frequently as required. Bins will be washed routinely, either on-site or by a professional cleaning service, and cleaning logs will be maintained to ensure adherence to the schedule.

Responsibility for placing bins

The responsibility for placing the bins at the collection point and returning them to the storage area will be managed by the premises staff. Staff members will ensure that bins are moved to the designated collection point on collection days and returned to the waste storage area promptly after collection to maintain cleanliness and order. Regular training and a schedule will be implemented to ensure these tasks are carried out consistently.
