## **1.0 Refuse Storage & Disposal Strategy**

The proposed refuse storage and disposal strategy for the new teaching block remains unchanged from the existing strategy used across the campus. The intention is to utilise the existing bin storage area, the location of this is indicated on drawing 9051. The College collect refuse and recycling and move the bins to this area at the end of day when the cleaners come in at 4pm.

## **2.0 Types of Waste**

There are several types of waste stream across the College including: General, Recycling & Cardboard, Paper, Confidential, Wee, Scrap, Oil & Chemical. Around campus there are mixed recycling and general bins both within the buildings and outside on campus.

## **3.0 Waste Collection**

The company used by the College for General Waste & Recycling Collection is Veolia Waste Management. Cardboard, Paper & Recycling is collected on Wednesday & Fridays, and General Waste is also Wednesday & Fridays.

All other waste is collected as and when required. The companies used for specific waste are as follows:

- Restore is used for Confidential.
- Premier Waste for Scrap and Skips.
- Chemgo is used for Chemicals.
- Olleco is used for Waste Oil.
