

PROPOSED WASTE MANAGEMENT PLAN
1:500 @ A3

Proposed bin storage area will be kept in the rear yard and will be open space therefore ensuring ventilation.

Management will ensure maintenance and hygiene and will bring out the bins to the collection point on collection day.

PROPOSED SERVICING PLAN
1:500 @ A3

Proposed use will be serviced from the same route that the existing social club currently gets serviced from.

The side street is a very quiet street and usually has a lot of on street car parking spaces. This will ensure that the stock will be brought in through the rear of the site.
