Subject: CDN/24/0784 - Discharge of Conditions 9b (Noise 1 - the use), 10a and b (Fumes, Vapours and Odours), and 11b (Noise 6 - Equipment) - Manchester Central Convention Complex

Hi Emily,

Our comments are as follows

Condition 9b - we can recommend this is discharged.

Conditions 10a and 10b - I have checked back the risk assessment/kitchen extraction strategy is still to be agreed for 10a. It was accepted in principle (recommendations from purified air) but we have not seen a detailed kitchen extraction strategy including servicing and maintenance. For 10b we need to detailed proof of the installation not just a statement saying it was installed, this should include photographs of the system including filters/odour controls. Neither 10a or 10b can be recommended for discharge.

Condition 11b - we can recommend this is discharged.

Kind Regards

Laura
