

# Waste Management Statement (incl Environmental Hazard controls)

## 1. Arrangements for control of waste during construction and operational phases

| Hazards<br>(See guidance document for examples) | Arrangements to eliminate/reduce risk<br>(List all the applicable controls from the pre-construction information pack / cdm construction phase plan / VITAL ENERGY environmental management procedures)                                              | What needs to be done<br>(List all actions that need to be taken)                                                                                                                                       |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Waste management                                | <b>CONSTRUCTION PHASE</b><br>All waste will be segregated into mixed, timber and metal waste. Materials will be utilised as best practice to minimise the amount of waste produced. Waste management plan to complete                                | Ensure waste stream is segregated if at all possible<br>Waste disposal documentation recorded<br>Waste management contractors details recorded<br>And all waste transfer notes to be kept in site file. |
| Waste management                                | <b>OPERATION PHASE</b><br>Only “office” waste should be generated through the sites operations, which will be collected in the common area waste disposal point<br><br>Service and maintenance waste will be removed on an AD-HOC basis as required. |                                                                                                                                                                                                         |

## 2. Arrangements for control of Environmental hazards

| Hazards<br>(See guidance document for examples)                        | Arrangements to eliminate/reduce risk<br>(List all the applicable controls from the pre-construction information pack / cdm construction phase plan / VITAL ENERGY environmental management procedures) | What needs to be done<br>(List all actions that need to be taken)                                                                                          |
|------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Asbestos Contamination within existing NHS Buildings and tracks<br>N/A | Full R & D asbestos surveys to be carried out in affected buildings. Surveys will identify the type of ACM and location in proximity to our planned works and activities.                               | ACMs will be removed and disposed of by a licenced specialist contractor as and when required. Keep register up to date and all waste transfer notes kept. |
| Logistics                                                              | All deliveries are to arrive to site between 7:30am –6pm Mon-Thursday,                                                                                                                                  | All operatives are made aware of this at inductions in the VE                                                                                              |

|         |                                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                |
|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|         | 7.30am to 12.00 – Friday, so that appropriate operatives are on site to off-load and to not disrupt NHSB out of hours. Works in residential areas shall also be subject to the same time restrictions.                                                                                                                    | site office. CONTRACTORS will be notified of this during the placement of orders FORS regulations to apply to all deliveries.                                                                                                  |
| Parking | There is no onsite parking for contractors. Parking will be available at the main hospital carpark or adjacent on street park & display areas                                                                                                                                                                             | Where possible, operatives will travel together to site on a morning to reduce number of vehicles to site.                                                                                                                     |
| Spills  | All work areas will have spill kits appropriate to works                                                                                                                                                                                                                                                                  | All spill kits to be located beside works being undertaken. If used to be disposed of in the correct waste bin and a new kit to replace the used one / then disposed of safely                                                 |
| COSHH   | All items used have been assessed in terms of the precautions and risk in terms of COSHH. Risk assessments are held on file within the H&S filing system within folder 5 within the Vital Energi site office. All substances will be in clearly marked, suitable containers on site in line with Vital Energi procedures. | Containers specifically for COSHH materials to be provided and secured. COSHH stores are provided within the Vital Energi site compound. Filo form foam pads to be suitably stored within the Vital Energi compound until use. |
| Noise   | Any works which would generate excessive noise<br>To be undertaken between 8.00am and 4.00pm<br>Monday to Friday no weekends<br>Construction site perimeter fencing to have acoustic panels fitted                                                                                                                        | Time restrictions to work noisy work activities<br>Correct fencing panels to installed around demolition and construction areas                                                                                                |
| Dust    | Dust suppression systems in place during demolition. Access roads to be kept clean and free of debris and mud                                                                                                                                                                                                             | Water spray system in operation<br>Access roads to be kept clean and free<br>Road sweeper to clean road access regularly                                                                                                       |
