## 147 mm QR5F Type Vortex Flow Control

Job Ref : 9170123

|              |               |                      |             |
|--------------|---------------|----------------------|-------------|
| Client Name  | Groundtech UK | Date                 | 17/01/2023  |
| Project Name | TBC           | For the attention of | Steve Burns |

|                   |          |               |          |
|-------------------|----------|---------------|----------|
| Design Flow       | 11.5 l/s | Flush Flow    | 11.1 l/s |
| Design Head       | 1.44 m   | At Head       | 0.403 m  |
| Minimum Pipe/Pipe | 225 mm   | Kickback Flow | 9.38 l/s |
| Sump Depth        | 390 mm   | At Head       | 0.938 m  |

## FLOW CONTROL QUOTATION REF. 9170123

### Product Information and FAQ's

#### DESIGN

##### Individual Design.

All of our Vortex Flow Control Units are individually designed to meet the client's optimum performance criteria.

##### Will our Vortex Flow Control's Block?

The relatively large cross sectional areas and high internal velocities greatly reduce the risk of blockage.

##### How Long Will They Last?

Crown Water Vortex Flow Control Units have no moving parts to wear or fail. Made from stainless steel plate they will resist scour, degradation and chemical attack. A Vortex Flow Control should outlast the sewer in which it is installed.

#### MANUFACTURE

Crown Water Vortex Flow Control Units are manufactured to a high standard

- 304 Grade Stainless Steel as standard. Other material optional.
- Plate thickness 3mm as standard Thicker plate used where required.
- Pulse arc Tungsten Inert Gas Welding. All seams continuous for maximum strength.
- Emergency Bypass Door fitted as standard to allow drain down and rodding access.
- Externally regulated ISO 9001:2008 Quality Assurance System

#### INSTALLATION

All of our Vortex Flow Controls are purpose built to suit the specific site and to fit easily into the drainage infrastructure. Units can be specially designed for retrofitting or for installation in difficult spaces

#### MAINTENANCE

Vortex Flow Control units themselves require no routine maintenance. Inspection chambers require inspection & maintenance in line with current practice.

#### WHAT DESIGN INFORMATION DO WE NEED?

We require the following basic information to specify a Vortex Flow Control for you.

- 1) The design Flow - *Maximum Discharge*
- 2) The design Head - *Invert to Top Water Level*

From this information we will size and design the Vortex Flow Control to meet the design criteria and to suit the proposed infrastructure.

#### SPECIFICATION

Includes: -

- 1) Data Sheet showing the Head/Discharge Characteristic, both graphically and numerically.
- 2) Installation Guide showing the outline dimensions of the specified Vortex Flow Control and the method of fixing.
- 3) Quotation covering the design manufacture and
