

University of Manchester

Decant Modular Temporary Building

Waste Collection Statement

A temporary bin/waste compound will be installed adjacent to the building.

The compound will accommodate the following:

- 1 x general waste eurobin (drop-sided)
- 2 cages for various recyclates (paper, plastic bottles, cans)
- 1 plastic container/crate for cardboard recycling
- 1 30L caddy/container for food waste

The above will be emptied on a daily basis (twice daily if required) by the in-house Campus Cleansing team.

General waste will be decanted into other eurobins on campus which are emptied daily (M-F) by Veolia limited and the waste will be taken to their waste transfer station in Trafford Park and ultimately used as a refuse derived fuel (RDF. – see here for full details of the waste disposal/treatment process.

We have a contract with Veolia (ES) Ltd to empty our eurobins across campus on a daily basis. Veolia are registered waste carriers and full details of their carrier registration as well as all the waste management sites they use to manage the University's waste are contained in the Veolia Waste Register found at the following link (see useful document box bottom right) -

https://www.estates.manchester.ac.uk/services/operationalservices/envsvcs/waste/managing_waste/

In addition to general waste the University collects a number of recyclates which are segregated at source and are collected by our own Campus Cleansing staff on a daily basis (M – F).

The following waste streams would be collected separately within the building and deposited in collection cages (see here for example - <https://pallettower.com/nestable-roll-pallets/four-sided-roll-pallet-split-gate/> [pallettower.com]) for collection by UoM staff.

- Paper
(<https://www.estates.manchester.ac.uk/services/operationalservices/envsvcs/waste/videos/paper/>)
- Plastic bottles
(<https://www.estates.manchester.ac.uk/services/operationalservices/envsvcs/waste/videos/plasticbottlerecycling/>)
- Cans

- Cardboard
(<https://www.estates.manchester.ac.uk/services/operationalservices/envsvcs/waste/videos/cardboard/>)
- Toner cartridges
(<https://www.estates.manchester.ac.uk/services/operationalservices/envsvcs/waste/videos/toners/>)
- Batteries
(<https://www.estates.manchester.ac.uk/services/operationalservices/envsvcs/waste/videos/batteryrecycling/>)
- Electrical waste
(<https://www.estates.manchester.ac.uk/services/operationalservices/envsvcs/waste/videos/electricalwasterecycling/>)
- Furniture
<https://www.estates.manchester.ac.uk/services/operationalservices/envsvcs/waste/videos/furniturerecycling/>
- IT related waste

The links above show the typical collection process for a number of waste streams.

In addition, arrangements would be put in place to collect food waste – see [Food waste collections \(The University of Manchester\)](#). Any food waste from staff kitchens would be put into a 30L food waste caddy which would be decanted on a regular basis by the Campus Cleansing team into food waste wheelie bins we have on site, which are emptied on a regular basis by Veolia ltd.

The number of bins internally needs to be agreed but typically we would install sets of the following bins in staff areas/kitchens as required -
<https://leafieldrecycle.com/product/envirobin-mini/> [leafieldrecycle.com] or
<https://leafieldrecycle.com/product-category/internal-recycling-bins/envirostack-stacking-recycling-bin/> [leafieldrecycle.com]
