I have looked at this and need the applicant to provide the following:-

1. Details of the volume of imported soils from each source so I can determine if the sampling was done in accordance with the MCC guidelines. **Approx. 90m³ of imported soil from both sources. 77m³ from the first with a 13m³ from the second.**
2. Any waste transfer notes for soil removed from the site or confirmation that no soil was removed from the development. **Please see above link to all waste transfer notes for soil off site. Total of 130no loads approx. 1740m³. However, this is for all waste soil off site - including from building footprints and foundation/drainage horizons.**
