

SCHEME FOR STORAGE AND DISPOSAL OF REFUSE

In the interests of residential amenity and safety, please find below details of the scheme for storage (including segregated waste recycling) and disposal of refuse (including location/management of collection) that has been designed for a Yoga Studio, which is the most recent business operator on the premises. Prior to the Yoga Studio, the premises was occupied by a Photography Studio.

Scheme Proposal Developed by B&M Waste Services:

The following proposal was advised by B&M Waste Services to ensure the segregated waste recycling, disposal of refuse and management of collection. This scheme has been designed for a Yoga Studio, which is the most recent business operator on the premises. Prior to the Yoga Studio, the premises was occupied by a Photography Studio, therefore the scheme for storage (including segregated waste recycling) and disposal of refuse (including location/management of collection) is designed around this business use. Please note that B&M Waste Management Services are also used by neighbouring commercial units on the block. Finally, the services provided by B&M Waste Services are flexible and therefore allow the addition of more bins and change in the frequency of collection should customer demand increase, business needs change or additional services be required.

Segregated Waste Recycling:

- One 360 litre general waste bin
- One 360 litre dry mix recycling bin for plastic bottles
- Waste recycling bins to be provided by B&M Waste Services

Management of Collection:

- Collection directly by B&M Waste Services once per week
- Collection directly by B&M Waste Services from rear access of the property
- Waste transfer to be undertaken by B&M Waste Services
- Flexible contract allowing the addition of more bins and change in the frequency of collection should customer demand increase, business needs change or additional services be required.

B&M Waste Services Information Pack:

Please refer to the attached B&M Waste Services Information Pack that highlights their award-winning carbon neutral waste management solutions. A selection of slides from their information pack is shown below.

Why us?

Sustainable waste management through our carbon neutral service

Established in 1999, B&M Waste Services achieves service excellence by providing waste minimisation, reuse and recycling solutions that actually work.

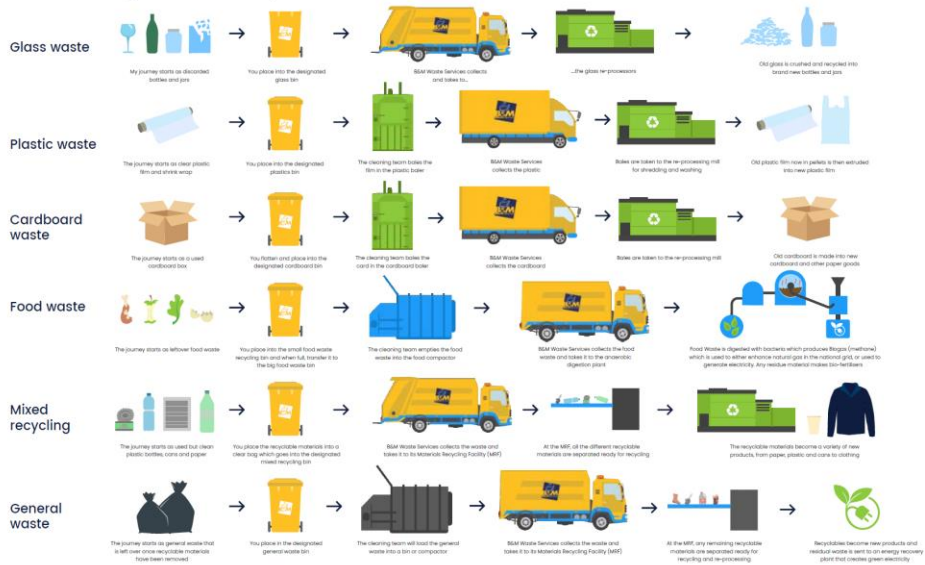

Partner with us and let us help you to achieve your business sustainability goals, by delivering what we promise, within budget and with a view to minimising your environmental impact.

We've been carbon neutral across the business since 2011 and assessed to PAS 402:2013 standards which looks at disposal and recovery rates, monitoring our waste re-use, recycling and zero waste to landfill aim.

In 2021, we achieved Carbon Neutral Plus status.

The waste journey Where do I go and what do I become?

Location of Bin Store (as per the City Council Approved Planning Permission Drawings)
