Re: CDN/24/0838 – Discharge of Condition 5 (Plant Screen)

Dear Jen / Paula,

Please find below our responses to the queries raised by yourselves in relation to Condition 5 of Listed Building Consent 136162/FO/2023.

We are now proposing a perforated steel screen with a pattern which matches the 'swirls' on the exterior features of the building. This screen would be finished in RAL7044 to best tie in to the building façade. The design has been discussed with the plant supplier and M&E contractor to ensure it meets all requirements for the building.

Proposed Screen Design
Flatscreen Perforated Design

Example of RAL7044

If you have any comments or questions regarding the above, please contact myself via Savills.

Regards,

C Williams
