

Belle Vue Speedway 2017 Limited - Waste Management Plan

National Speedway Stadium

Application number: 139607/FO/2024

The following waste management plan has been prepared by Belle Vue Speedway 2017 Ltd in relation to planning application 139607/FO/2024 for the install of a food and beverage kiosk in the South Stand Enclosure. This stand will operate on event days with the South Stand capable of operating at a maximum in and e-gress capacity of 3,000. South Stand has a capacity of 1234 spectators.

Waste Management Summary

Types of waste produced

The kiosk's main function will be to serve food and drink to visitors attending speedway. Each event takes place over a maximum of 4hr window. Types of waste created by customers and kitchen staff during this time includes:

Customer Consumables

Plastic drinking cups (compostable)

Food packaging (cardboard food packaging for burgers and chips)

Wooden cutlery

Hot drink paper cups

Snack packaging (crisps & chocolate)

Item	Likely consumption per event	Method of disposal
Plastic drinking cups	500	General waste (non-recyclable)
Food packaging	200	General waste
Wooden Cutlery	200	General waste
Hot drink paper cups	40	General waste
Snack packaging	40	General waste
Pie Foil Trays	50	Recyclable waste

Kitchen Waste:

Food & drink packaging cardboard boxes (compostable)

Food wrapping (plastic where needed to protect food)
Oil drums (cooking oil)

Item	Likely disposal per event	Method of disposal
Cardboard boxes	10	Dry Mixed Re-cycling
2l Drinks bottles	10	Dry Mixed Re-cycling
Plastic food wrapping	20	General waste
Waste cooking oil / oil drums	1 every 2 events or drained when not in use for longer periods.	Sealed container and deposit at Re-cycling centre.

Unsold food

Food with a shelf-life within range that can be re-used will be frozen and stored in the freezers of the main North Grandstand Kitchen.

Food with a short shelf-life / cooked and not sold will be given to Volunteers / staff. Any remaining will be disposed of in a sealed plastic bag which will be disposed into a fully enclosed lockable, rigid leak-proof bulk container.

Waste Food – Customers

There will be multiple 80 litre bins (General waste / mixed re-cycling) in the vicinity of the kiosk which will be emptied regularly throughout the event and taken to the appropriate 1100 litre waste bin (see waste storage) by on-site cleaners.

Waste Food – Kitchen

Food which is considered waste (not sold / out of date) will be disposed into a sealed plastic bag which will be disposed into a fully enclosed lockable, rigid leak-proof bulk container.

Reducing Food Waste

Belle Vue operates an itemised product inventory till system to ensure its operations are profitable and food isn't being produced to a surplus and wasted. The operation of this system means that there is very little food waste per event, reducing food waste disposal from the kitchen and constantly monitored and reported.

The kiosk menu operates on items which are / can be frozen to further reduce waste, products include:

Burger buns – bought fresh and re-frozen if unsold

Fresh pies – bought fresh and if not used are stored in the freezers and can be cooked from Frozen.

Burgers – frozen and cooked to order

Chips – frozen and cooked to order

Food Storage

There is to be minimal food stored in the container with the bulk being stored and coming from the existing North Grandstand where cooling refrigeration rooms and freezers are in place. Fridge and Freezer will be in situation to keep stored food to regulation.

Bins and Bin Storage

South Stand Enclosure

The Kiosk will operate 2 bin type system, one for general waste and 1 for mixed recycling.

This will be replicated for public outside of the Kiosk. Any waste created within the grandstand will be collected and disposed of according to product type at the end of the event sorted for disposal or recycling.

At the end of the event, the waste from these bins will be transferred into large 1100 litre bulk waste container bins in the North Stand, split for dry re-cycling and general food waste. These have securely closed lids and lockable storage area.

These bins are stored out of daylight, away from water courses and in a back-of house area, free from public and risk of vandalism.

No waste will be stored in the South Stand Area or within / proximity of the Kiosk at the close of the event, all waste will be transferred over to the bulk bins at the bin store in the North Grandstand.

Frequency of Collection for all bins

Bin collection takes place twice weekly and is scheduled on Monday and Thursday of each week. This falls under the responsibility of council appointed stadium operator, GLL. The stadium waste contract is with Grundon but due to them not serving Manchester, they sub it out to Lavells who are responsible for waste collection for the stadium.

Responsibility for removing Waste

The Catering Manager in the Area will be responsible for all waste removal and correct storage of food at the end of each service shift.

The General Manager for Speedway will be responsible for over-seeing the removal of waste by cleaners, TW Cleaning are the contractor cleaning company in place and ensure this is disposed of into the bulk bins and correctly segregated for recycling or disposal.

The Stadium Operators, GLL are responsible for the frequent collection of waste and proper disposal via the contractor.

The cost of waste management is covered by:

Belle Vue:
Cleaning team (TW Cleaning)
Bins at locality

GLL:
GLL's Stadium Operations contract with the Council covers all waste management at the stadium.

Targeting waste reduction

Belle Vue Speedway 2017 Ltd will endeavour to use procurement methods which are sustainable and reduce landfill. It already uses products which will breakdown over time in waste.

Once operational, Belle Vue would like to investigate the better use of plastic cups, including a cup re-use scheme.

Encouraging a clean site

The kiosk will display signage clearly stating what can and can't be re-cycled and to encourage proper disposal of waste on-site.

Where waste isn't placed in bins, on-event cleaning staff and GLL events are responsible for litter picking across site to ensure waste from the site doesn't enter the local residential areas.

Feedback Mechanism

Belle Vue Speedway can receive feedback via all channels and welcome constructive feedback from for employees or spectators to provide suggestions and report issues related to waste management.

Documentation and Reporting

Event reports are done after every meeting and report to manage issues and performance with stadium operations and operators.
