

WASTE COLLECTIONS

The standard hours for bin collections are Monday to Sunday between 09:00 - 23:00. However as Depot holds events between 08:00 - 05:00 waste collections may be required to sit outside of these hours. Bins are collected from Travis Street and Temperance street, therefore minimising any impact on local residents (who are situated off baring street) and as such there have been no complaints to date.

The following are examples of event schedules demonstrating why waste collections may sit within or outside of standard hours .
Collection times are predominantly determined by the start time of the event and in turn the client preparation time prior to opening the event.
Bins must be cleared in ample time prior to clients arriving on site each day to set up for the new day event.

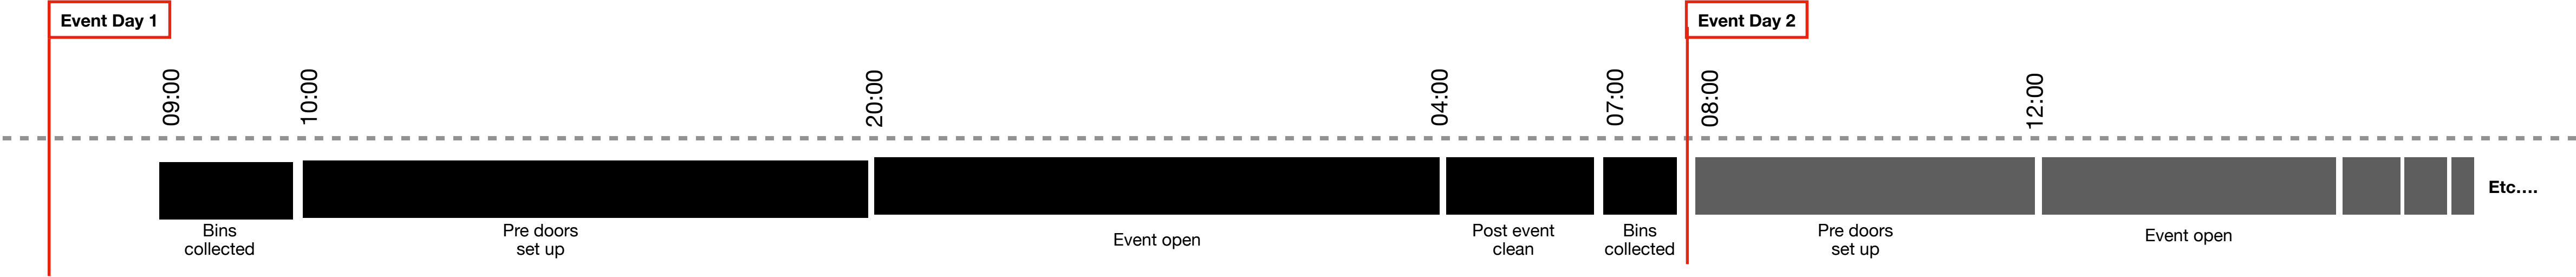

(Please note: times vary for each event held at Depot Mayfield and as such the following are examples only.

Example 1
A full day corporate event open to attendees from 9am until midnight

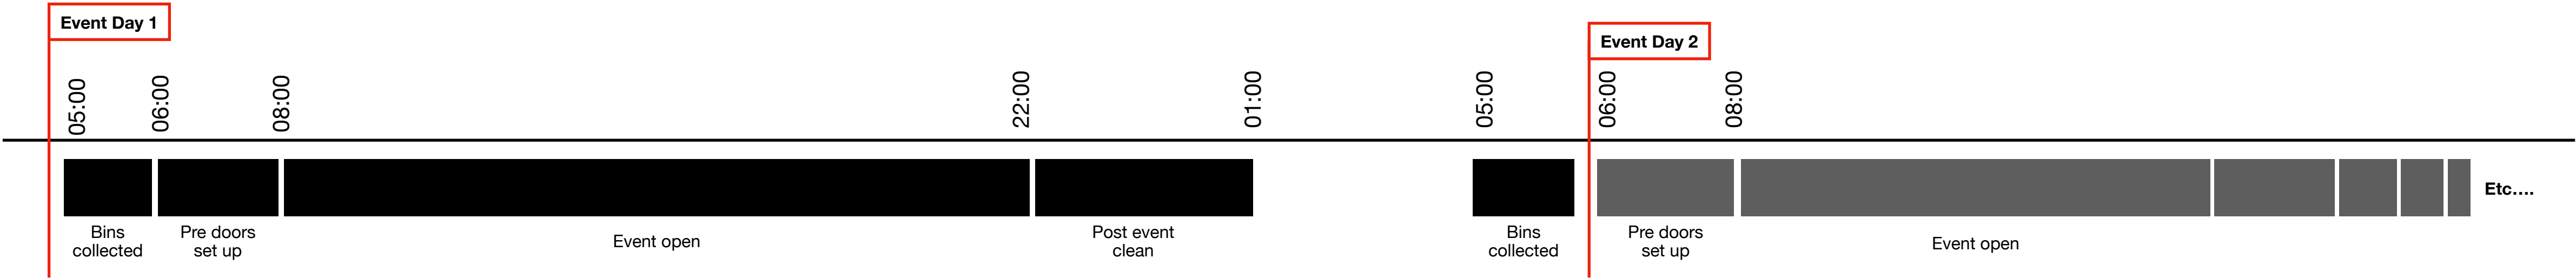

A full day event takes place with waste being collated and stored through the day. After the event (post midnight) the event space is fully cleaned, waste bins filled and made ready for collection. The bins are required to have been emptied (approx 6am- 7am) prior to the clients production team arriving back on site for set up at 7am.

Example 2
An night event leading into a day event

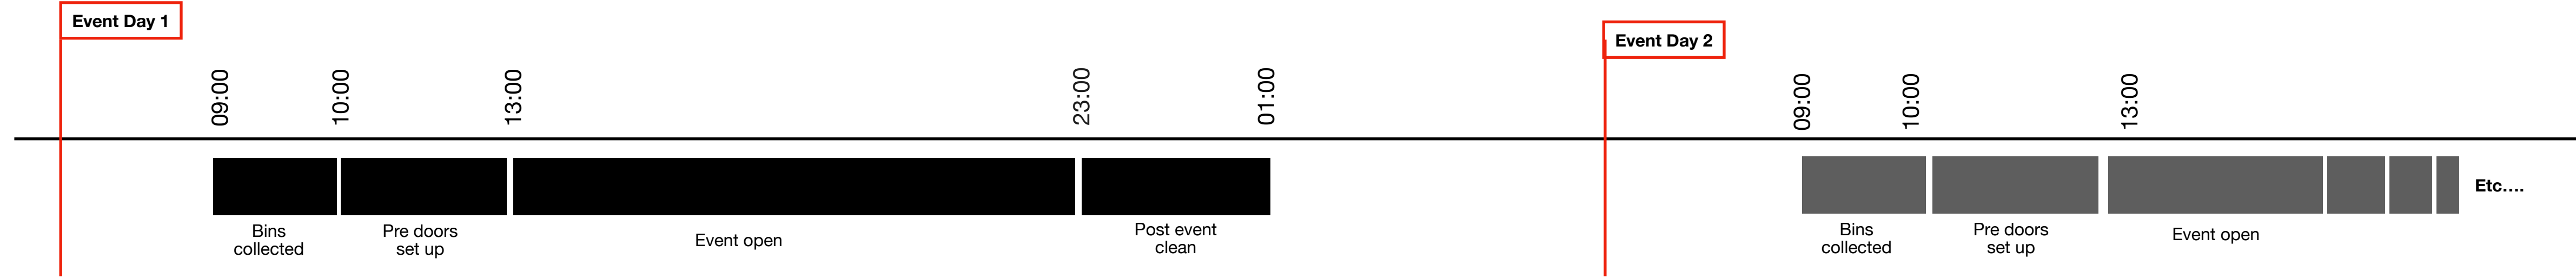

The morning of the first event day, the waste accumulated during the production days prior can be collected during standard hours as the event opening times is later in the day.
The Day 1 event finishes at 4am with the venue being cleaned down / waste ready for collection by 7am, before staff arrive on site to prepare for event day 2 at 8am which has an earlier start time of midday.

Example 3
A conference with a breakfast networking meeting each day

Waste generated the prior day during the production set up needs to be collected before the staff and caterers arrive on site at 6am preparing to open the event at 8am. Whilst the Day 1 event itself finished at 22:00, the clean down and preparation of waste for collection isn't completed until 1am. Bins need to cleared again prior to the Day 2 beginning again at 6am.

Example 4
An afternoon / evening event, with an afternoon start time.

As staff are on site at 10am and the event begins at 1pm each day the bins from the previous event day (or production day) can be collected at 9am each day (within standard operating hours)
