Dear Ben,

Re: The Castings, Heyrod Street Manchester – Condition 9 Archaeology

Further to recent communication with MOLA regarding the archaeological condition (9) for the above site, I am writing to ask for discharge of this condition following submission of their Post-excavation Assessment Report. I can confirm that we have made provision for and will commit to the delivery of the full analysis reporting and archiving as set out in Sections 10.2 and 11 of the Post-excavation Assessment report and including the three points of clarification that you make in your email to Claire Finn of MOLA on May 24th 2024 at 11.54am.

The final report will be submitted to you in due course with archive completion at the same time.

I would be very grateful if you could confirm full discharge on this basis.

Yours sincerely,

Mark Woodrow
