Planning Portal Reference PP-13183245

Dear Sir/Madam,

PART DISCHARGE OF PLANNING CONDITION 3 ATTACHED TO NON MATERIAL APPLICATION 139558/NMC/2024 PURSUANT TO PLANNING PERMISSION 137424/FO/2023 FOR THE ERECTION OF A TWO-STOREY DATA CENTRE (4153M² GIA), TOGETHER WITH THE RECONFIGURATION OF ACCESS ARRANGEMENTS AND PARKING LAYOUT, LANDSCAPING AND ASSOCIATED WORKS, FOLLOWING THE DEMOLITION OF SIMON HOUSE

SIMON HOUSE, BROWNLEY ROAD, MANCHESTER M22 5RA

On behalf of the applicant Teledata UK Ltd we seek approval of details reserved by condition 3. The submission is supported by this cover statement, a 1:1250 Site location Plan and details of the proposed elevational materials and treatments.

The partial discharge of condition (materials) in respect of the following materials – cladding, louvers and roof materials was granted 5 June 2024 (Reference CDN/24/0488). The final materials have now been agreed by the applicant. Accordingly, we seek a partial discharged of Condition 3 for the outstanding materials, namely brick slips and tiles.

CONDITION 3- MATERIALS

Condition 3 requires that:

3)"Above-ground construction works shall not commence until samples and specifications of all materials, to be used in the external elevations have been submitted to and approved in writing by the City Council as local planning authority. Thereafter the development shall be carried out in accordance with those details."

Subsequent to this permission, a non-material amendment to planning permission 137424/FO/2023 was approved to amend the wording of Condition 3 to allow above ground works to commence prior to submission of external materials (Reference 139558/NMC/2024). The approved amendments to Condition 3 are as follows:

3) "No materials to be used on the external elevations of the building, shall be installed/erected until details have been submitted to and approved in writing by the City Council as local planning authority. Thereafter the development shall be carried out in accordance with those details".

Information Submitted

The following details are submitted:

- Finishes Schedule Reference ASC401 prepared by ttsp architects
- Typical Aerobrick Construction Details – Composite Panel (Dwg 007 Rev 1)
- Aerobrick Brochure – T.i. Dynamica facades
- Terracotta – Typical Total Stone Construction Details (Dwg 010)
- TI Terracotta brochure
- Images of materials

Background

The design of the elevations is set on the following plans as approved under application 137424/FO/2023

- Elevational Treatment South and West - 137424/FO/2023; and
- Elevational Treatment North and West - 3447-TSP-ZZ-XX-DR-A-05-791- Rev P02

The submitted finishes schedule provides the specific material specifications and should be read in conjunction with the approved plans as above.

As part of the original submission, it was a priority to include a mix of materials, finishes and patterns to reduce the bulk of the built form and to provide visual interest and a high quality street scene particularly when viewed from the public realm. This requirement has been carried forward with the choice of submitted materials.

The elevation plans show the north elevation which looks into the site comprising primarily cladding using two distinct colours (Rainspan Sirius and Slate Grey) to break up the elevation. At upper level around the building there would be Caice louvre panels. (RAL 9006). The plant enclosure adjoining the western elevation of the building will be open from above, but enclosed on the south, west and north sides by Caice louvres (RAL 9006). These materials have now been approved under decision CDN/24/0488.

The south and west elevations have a more visual presence from the street and are predominantly tiles and brick slips. It is these materials that are the subject of this submission.

Conclusion

In accordance with the above information, we seek the partial discharge of planning condition 3 attached to non-material amendment 139558/NMC/2024 pursuant to planning consent 137424/FO/2023.

We trust that the information provided is sufficient to secure the discharge of this conditions for the relevant materials, however, if further information is required, we will be happy to provide this. We look forward to receiving confirmation of validation in due course.

Yours sincerely

Vivienne Goddard
