STAIRCASE SPINDLE REMOVAL

16 Newton St

Staircase Spindle Removal

Step 1 - Carefully remove outside edge of mitered nosing with hammer and wood chisel being sure to work along the joint.

Existing tread with missing nosing which shows the section of nosing to be removed.

ATELIER.MB

Step 2 – Gently push the bottom of spindle out of the notch in the end of the stair tread. This will free the bottom section of the spindle.

Step 3 – Ease open small gap between spindle and handrail (Butt Joined). Using a hack saw with small thin blade cut nails holding top of spindle to handrail.
