Proposed Air Conditioning Installation at Melissa Timperley Hair Salon

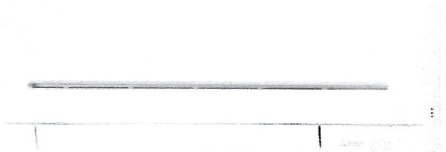

Installation details compiled by Daniel Crook – 22/2/24

Proposed Equipment:

Internal

3 x MSZ-AP50VGK, wall mounted indoor units (one installed on each floor)

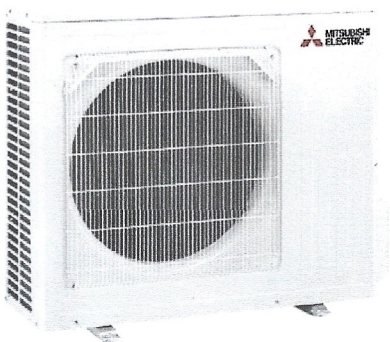

Dimensions – 798mm wide x 219 deep x 299 high

External

3 x MUZ-AP50VG, wall mounted external condensing units

Dimensions – 800mm wide x 285 deep x 714 high

3 x external condensing units to be wall mounted using Unistrut cantilevered arms (450mm long) in location as pictured below. The external condensing units will be screened by a wooden fence that will completely surround the units at a height to ensure that there is no visibility from Tib Street or the nearby premises. (see elevation drawings supplied).

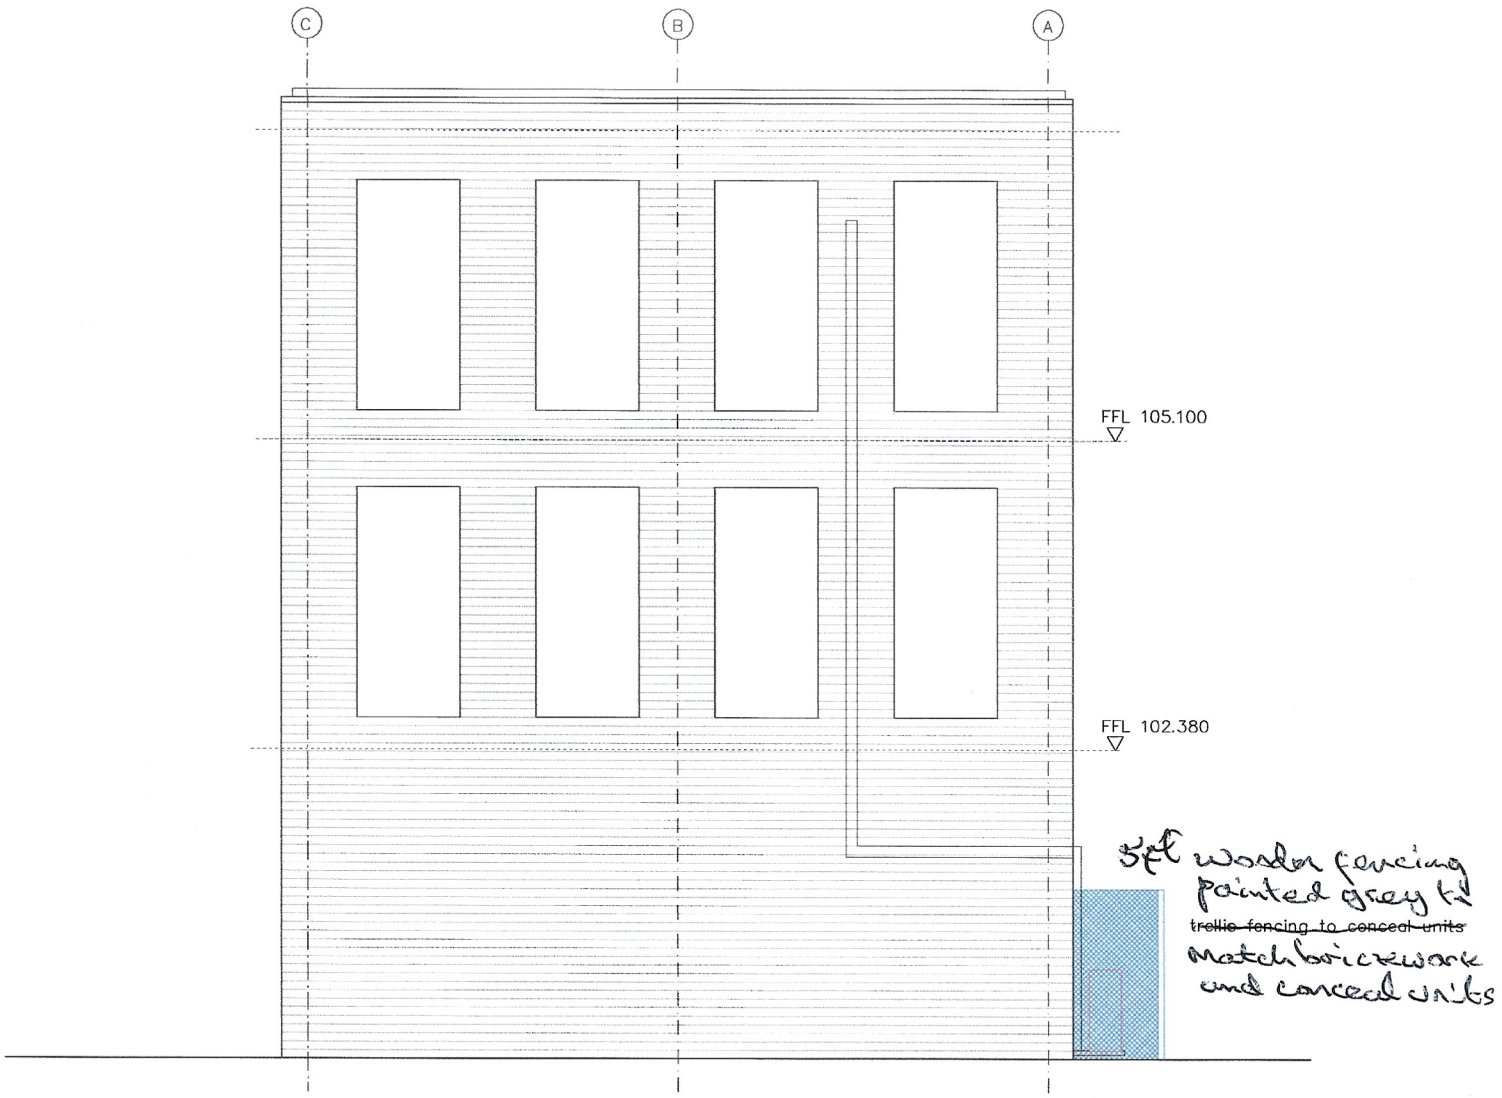

South west Elevation

5 feet high Wooden fencing painted grey to Match ~~trellis fencing to conceal units~~ brickwork and conceal units

North West Elevation

All interconnecting pipework and wiring run to indoor units via Inaba Denko black plastic trunking – 100mm wide x 70mm deep. This will be painted to the exact colour of the brickwork once installed.

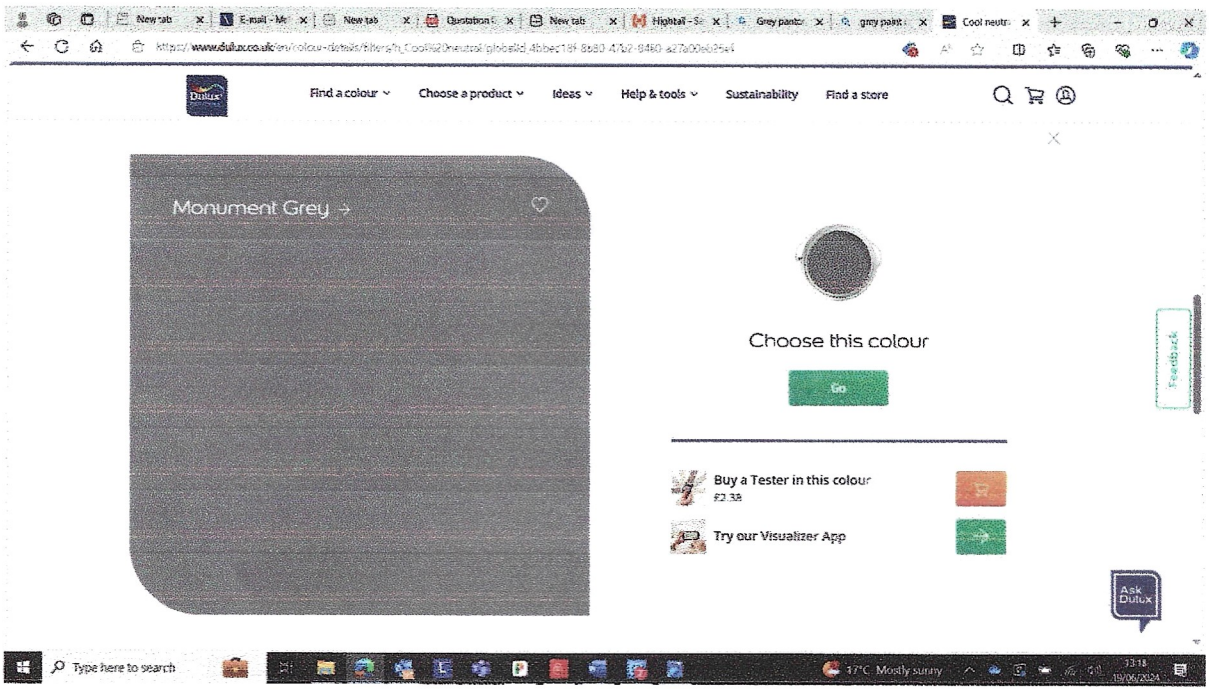

Pipe runs for the units on the first and second floors to be routed around the rear elevation of the building and to rise in a single run of trunking to pick up the penetrations to the first floor and the second floor.

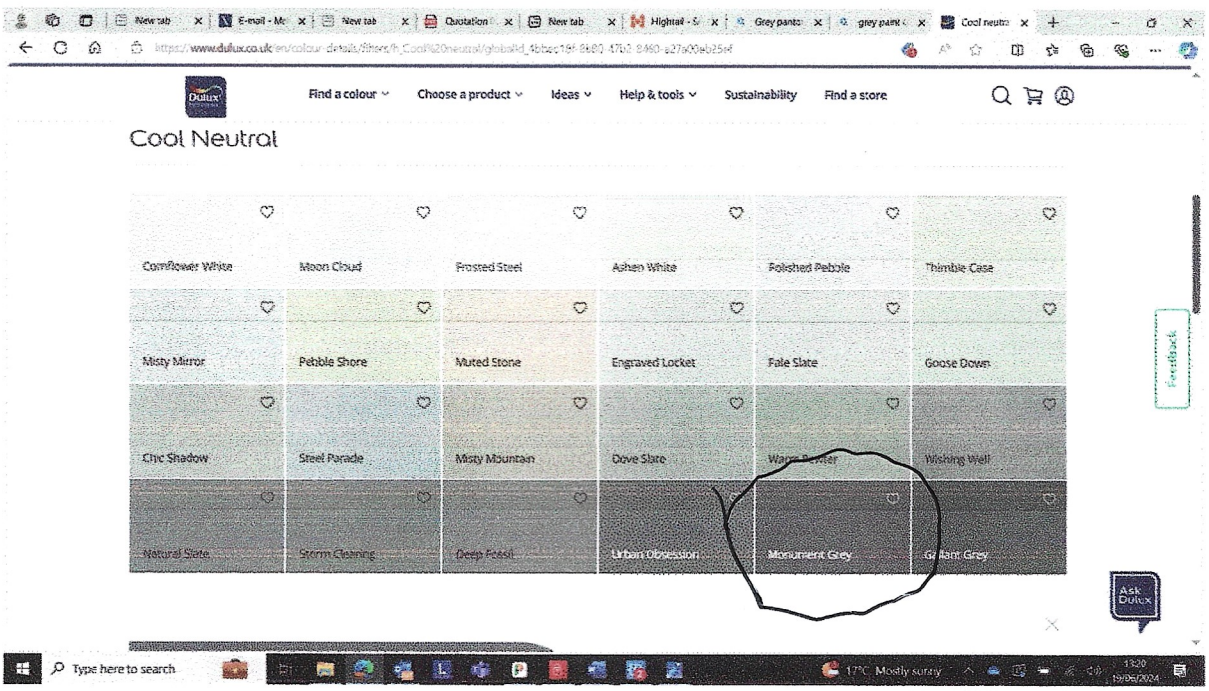

Paint colour for pipework and screen to blend with exterior brickwork of the building

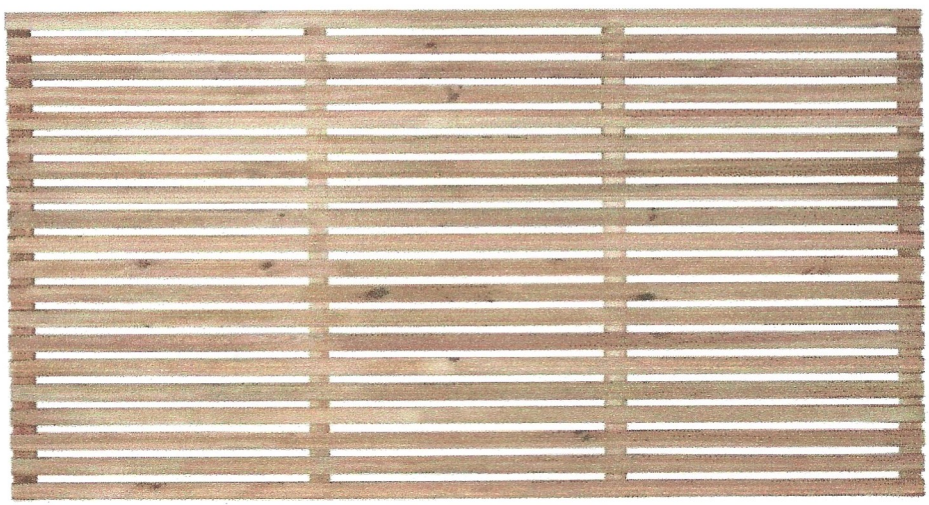

Manufacturer; Dulux Weatherproof Exterior Paint

Monument Gray Pantone in relation to the other grey range options.

5ft high fence to screen Air Conditioning extractor units – to be painted grey – see colour details on previous page. To be bespoke fitted by a Joiner to allow service access and make secure.

Ground Floor Indoor Unit

Pipes to run to outside elevation through toilet.

First Floor Indoor Unit

Second Floor Indoor Unit
