Internally illuminated brushed stainless steel panel
with halo-lit letters

Brushed stainless steel sign

Notes

1. Halo illuminated Fascia Sign - Folded 3mm brush metal aluminium composite front tray complete with fret cut logo and text. Fret cut to be inlaid with push through 15mm opal acrylic with opaque vinyl applied to the face. Folded 3mm white aluminium composite back tray complete with LED modules to create halo illumination of the logo and lettering. Front tray to fix over back tray and to be mechanically fixed to existing fascia. Lighting to be 200-300 CDM, temperature 6500K (Cool White)
2. Double sided illuminated projecting sign - Consisting of painted steel bracket to be mechanically to existing shop front, Sign body to be constructed of built-up metal or foamex mechanically fixed to bracket. Sign to have fixed centre LED. Face panels to be 3mm opal acrylic and trapped behind removable bezel's. Face to illuminated white. Lighting to be 200-300 CDM, temperature 6500K (Cool White)
3. Non-illuminated Slat Sign - 3mm folded brushed metal aluminium composite tray sign mechanically fixed to stone work covering existing holes. Sign complete with 6mm clear acrylic printed slat panels fixed to sign board using satin chrome sign stand off's.
