DIGITAL MAPPING AND WAYFINDING INFORMATION

Please note all locations and artwork are indicative and do not reflect final locations. Images are for illustrative purposes only to show how wayfinding content will connect with other surrounding neighbourhoods and destinations.

REINFORCING DESTINATIONS

At decision points in and out of Mayfield, neighbourhoods and destinations should be reinforced at key junctions clearly visible from a distance.

Please note all locations and artwork are indicative and do not reflect final locations. Images are for illustrative purposes only to show how wayfinding content will connect with other surrounding neighbourhoods and destinations.

WIDER AREA MAPPING

Mapping should be developed which highlights not just the Mayfield's area but the City as a whole with the wider connections and walking times. We suggest also having mapping that just shows Mayfield once the site is developed and will need more navigational aid for users.

There could also be the opportunity to incorporate interpretation information relevant to Mayfield's history and story so far and ecology etc.

Please note all locations and artwork are indicative and do not reflect final locations. Images are for illustrative purposes only to show how wayfinding content will connect with other surrounding neighbourhoods and destinations.

Below is an indicative map of the level of information for a wider area map. This should be further developed to show key destinations within Mayfield and the wider city area.
