EXTRACT IN-USE

fire exit

A horizontal beam of length 5m is shown. A triangular load starts at 0 at the left end and increases linearly to 1.50 at the first point load. The first point load is located at a distance of 0.5m from the left end. Subsequent point loads are located at 1m, 2m, 3m, 4m, and 5m from the left end. The triangular load is represented by a series of vertical lines of increasing height from left to right, forming a triangle with the beam axis.
