

- Key:
- Schwegler 1B Nest Box
 - 2F Schwegler Bat box

Notes

Bat boxes are to be installed on the retained trees at the highest possible points (minimum 4 m from ground level). All boxes are to be located to face south to south-east to allow the box to be warmed by the sun. They should not be placed where the flight path would be blocked by obstructions or vegetation and should be placed in sheltered locations.

Nest boxes are to be installed on the retained trees at the highest points (minimum 2 m from ground level). They are to be located to face between north and east to avoid strong sunlight and high winds. They should not be placed where the flight path would be blocked by obstructions or vegetation.

Boxes of similar specifications but different brands may be used.
