Description

This is great as a space-saving bike storage locker. By storing the bike on the back wheel, you use less floor space, freeing up valuable garage, garden, or indoor car park space.

Inside the thick, weatherproof steel unit is an easy-access guide ramp and a wheel retaining clamp. Simply open the heavy-duty door. Then lift and push the bike into the wide guide rail. When the bike hits the back, the wheel retainer drops down and clamps the bike into place. Close and lock the tough pick-resistant lock. Easy!

Installation:

As standard, this locker comes flat packed for home assembly; the additional charge for installation covers our operatives assembling and bolting the locker down on-site and in position for you. Ready for immediate use.

Options:

Our lockers come in green, ivory and grey. You can select your colour from the drop-down menu.
