Homeowner Planning Application

Rear Dormer Extension and Associated Works at:

82 Atwood Road, Didsbury M20 6JN

May 2024

Prepared by:

Susan McBain

1.0 Introduction

1.1 This is a supporting for the proposals at No. 82 Atwood Road, Didsbury, M20 6JN, and includes a selection of aerial views of the property, and photos of other rear dormer extensions viewed from the pavement.

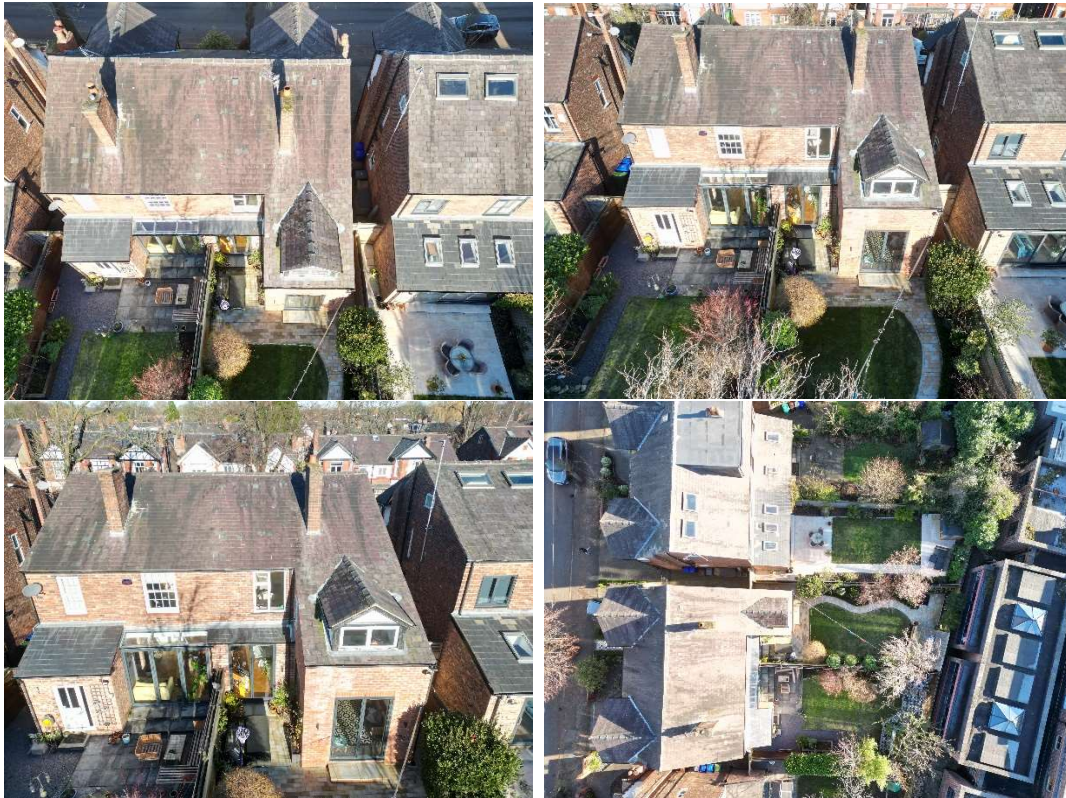

2.0 Existing views from the pavement

2.1 Some views of No. 82 from the pavement, showing the difference in height between the two adjacent buildings. No. 82/80 is smaller.

3.0 Aerial views

3.1 These aerial views show the existing construction of the rear of No. 82, and environs.

3.2 The last photo shows the relationship with the school, at the end of the garden.

4.0 Ridge height views

4.1 These ridge height views are included to show the comparison in the ridge height between No. 82 (and No. 80, and their neighbours No. 78 and No. 84. Although the adjacent dwelling look very similar they are both taller buildings.

4.2 Difference in ridge height between No 78, higher (left) and No 80, lower (right). No 80 adjoins No. 82.

4.3 Difference in ridge height between No 82, lower (left) and No 84, higher (right).

5.0 Views along Atwood Road

5.1 These photos show the views along Atwood Road, outside No. 82, and show that it is difficult to see through to the rear of the dwellings down the alleyways, and also that it is difficult to see the ridge lines when walking on the pavement.

5.0 Other dormers

5.1 These photos show the views through the dwellings to other rear dormers on Atwood Road. It was noticeable when taking these photos, that you had to stand in the right location on the pavement to be able to see the dormers, as they don't really have an impact on the street scene.
