Good morning, John,

Scotscroft Towers Business Park Wilmslow Road Manchester M20 2RY - 139113/TCA/2024

The applicant has proposed to carry out a 20% complete crown reduction on the Beech tree pictured below:

I can confirm that whilst we do not normally agree to this kind of pruning spec, this would be considered good tree management for this particular tree as it has multiple stems with included unions. With no management plan for this tree, it could result in stem failures. Keeping the overall size of the tree reduced will reduce the wind load on the unions.

Kind regards

Rudi Farghaly
