Dear Mr Mitchell,

I wish to appeal against Manchester City Council's (MCC) decision to erect a 15m telephone mast on Fog Lane and would detail the following reasons for my challenge:

- 1) Fog Lane is a residential area and other locations have been ruled out on this basis. Indeed MCC have a duty to place a mast in a location that has the least impact on residential households;
- 2) Considering the above, I believe that MCC have failed to investigate the potential of other locations that are less residential / more commercial;
- 3) Also, the purpose of the mast is obviously to enhance mobile phone coverage and per the developer's original recommendation Catterick Road was the optimal location, but Fog Lane is half-mile away from this destination and where Fog Lane is at the northernmost edge of the coverage hole, this makes the choice of location sub-optimal.

I trust my objections will be taken into consideration.

Yours faithfully,

Damien Powell
26 Fog Lane, Manchester, M20 6AL
