Good Morning Claire,

Thank you for your comments. We will review with the LLFA and United Utilities and will take on board your comments.

Kind Regards,
Chloé

Subject: GMMC96361CC - Response from the Environment Agency

Dear Chloe,

Thank you for your enquiry which was received on 15 Aug 2018.

We respond to requests under the Freedom of Information Act 2000 and Environmental Information Regulations 2004.

Please see our officer's advice below:

"The grit/salt storage is fine as long as this does not cause a pollution to a watercourse. I would suggest bunding the immediate surrounding area with "sleeping policemen" so that any grit and salt dissolved in rainwater is contained and kept away from surface water drains while retaining vehicle access.

However, de-icing vehicles in this outside area would only be acceptable if the run off from this activity is directed into a sealed drainage system and disposed of appropriately, or into combined/foul sewer (with permission from United Utilities)."

Please refer to the [Open Government Licence](#) which explains the permitted use of this information.

Please get in touch if you have any further queries or contact us within two months if you'd like us to review the information we have sent.

Kind regards,

Claire Cooke

Good Afternoon Sir/Madam,

Please see my email to Sandrine below. Please could you review and advise regarding pollution protection measures.

Kind Regards,
Chloé

Subject: Hammerstone Depot
Importance: High

Hi Sandrine,

I've been liaising with Manchester City Council LLFA regarding the above scheme and we require some advice regarding pollution protection (see attached email correspondence with MCC).

The proposed development contains a grit store and de-icing facility with the surface water drainage being proposed to connect to watercourse (Corn Brook). We are unsure whether there would be a requirement to treat or protect the watercourse from potential pollutants.

Would this be something you would be able to assist with?

Kind Regards,
Chloé
