

T1 -
extremely Mahre
Beech tree to
front of church.
A large number
of branches are
overgrowing the
Church roof and
limb.
Causing problems
to church users
and children and
staff. Lots of dead
wood →
We want to push
these branches
back away from
the church and
the limb, it needs
dead wooding also
- This work is all
in the way or
safely and re balance
as it has an awful
lean.
