SH Lighting have produced a solar powered private lighting design of which specifies 3.0m tall columns fitted with LED downward facing lanterns.

Drawing reference: SHD692- Private lighting Design rev – 2

Please note:

In addition to the afore mentioned Apartment external areas design, PIR spotlights shall be fitted in key locations around the Apartments that will cover Bin/Bike stores and entrance points to the buildings.

Private areas within house curtilage

Every house shall be fitted with the following light fittings:-

A **Deta** LED dusk-dawn light fitting fitted to side of the front entrance door.

A **Deta** 240V PIR operated security spotlight fitted above reach at the rear above access doors.

Please note:

Product outputs will remain the same throughout the construction phase, however, manufacture spec may change depending upon supply.
