01.00 Design brief

DAWNVALE GROUP

The design of the Vegetarian Society space within Jacksons Warehouse must be sympathetic to the building's Grade 2* listed status. This means that the existing brickwork walls and beamed ceilings should be retained wherever possible. The new layout should also respect the building's original features and character.

The new layout of the Vegetarian Society space should create separate areas for different activities, such as cooking classes, dining, and socializing. However, these areas should be designed to flow together seamlessly, creating an overall sense of openness and relaxation.

The cooking school area of the Vegetarian Society space must have hygenic and easily cleanable surfaces. This is essential for food safety and to ensure that the space can be kept clean and tidy. The layout of the cooking school area should also allow all students to easily view the tutor from any cooking station.

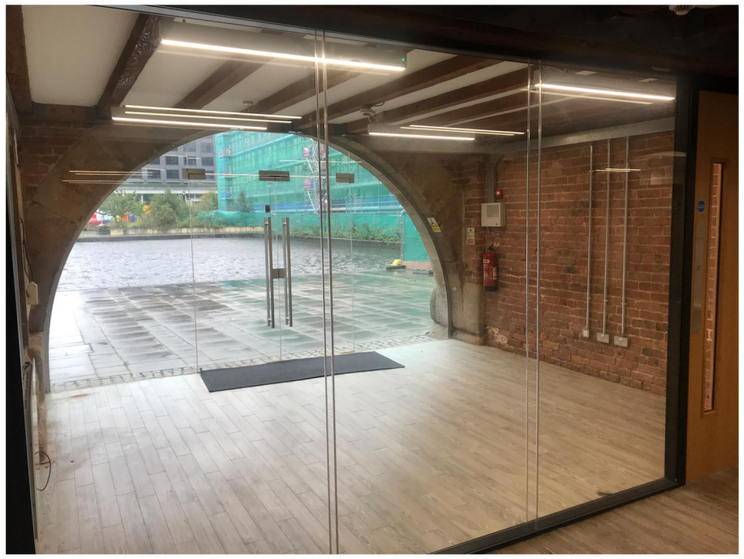

The overall design of the Vegetarian Society space should be light and airy, with a focus on natural materials such as wood and brick. The space should also be welcoming and inclusive, reflecting the values of the Vegetarian Society.
