

The Conservation Rooflight

Why specify the Conservation Rooflight?

The Conservation Rooflight has been continually specified by architects for over 25 years. Architects specify this range because:

- ▀ It meets modern building standards including Conservation, English Heritage and the National Trust
- ▀ Our founder, and architect, Peter King designed it. The Conservation Rooflight is the original and still the most authentic design available
- ▀ With 15 standard sizes and a made to measure service, we will always have a size to fit your project. This means you can preserve the integrity of any historic building and avoid cutting existing rafters. You can also create practically unlimited arrays
- ▀ The linings on the inside go right up to the glass, giving a clean internal finish

For more technical information visit
