NOTES: Position – Where two values are given, the first value is the root entry into the trench. The second value is where the root leaves the trench.

Depth – Where two values are given, the first value is the root depth at the entry point into the trench. The second value is the root depth at the exit point from the trench.

Diameter - Where two values are given, the first value is the root diameter at the entry point into the trench. The second value is the root diameter at the exit point from the trench.
