1 JURY STREET, CHEETHAM HILL, MANCHESTER, M8 8FN
PRELIMINARY RISK ASSESSMENT (DESK STUDY)

INTRODUCTION

A commercial development is proposed. The objective is to carry out a Preliminary Risk Assessment to consider contamination, landfill gas and geotechnical issues.

SITE DESCRIPTION

The overall shop complex is about 85 by 15m, located to the northwest of Jury Street in Manchester and at OS Grid Reference 383550, 399720. The area of proposed development referred to as 'The Site' is a rectangular section at the northeast of the plot. About 12 by 15m.

Inspected on 28/9/23 by Mr M Whitaker, the plot comprises concrete surfaced yard with several shipping containers at its northeast and covered boxes at the southwest. There are no obvious signs of contamination.

To the southwest is the existing shop, to the northwest a warehouse to the southeast a cash and carry and to the northeast is Strangeways Prison about 6m above the site. The area slopes down to the southwest.

PROPOSED DEVELOPMENT

It is proposed to build a commercial storage unit, almost filling the site. There will be no landscaping and no water supply.

LEGAL/COPYRIGHT

Material may be included in this report from Ordnance Survey (Licence No. AL100031635), Landmark, Environment Agency, Coal Authority and others. It may be copyright and the usual restrictions apply. This report can only be relied upon if the invoice has been paid promptly and in full. This report may be signed by an individual, but only on behalf of Worms Eye Limited.

NOT INCLUDED IN THE REPORT

- Arboricultural or Invasive Plant Survey (Japanese Knotweed etc.).
- Asbestos Survey
- Mining Risk Assessment.
- Flood Risk Assessment.
- Underground Services Survey.

General comments may be made where they are applicable to the environmental and geotechnical risk assessment. These do not constitute a detailed risk assessment.

DATA SOURCES

The following data sources have been viewed in compiling this report.

- BGS, Geology Map, 1:50000 scale, Solid and Drift Edition
- BGS, on-shore boreholes scans
- Landmark Envirocheck Report, 28/9/23
- Ordnance Survey, Historical Maps, 1:10000 and 1:2500 scale
- Walkover Survey, 28/9/23.

This report is referred to as a Preliminary Risk Assessment (PRA), alternative names are 'Phase I' Report or a Desk Study. The polygon on the maps cover the whole shop complex. Distances have been amended to the smaller area of the site.

ENVIRONMENTAL DATA

A Landmark Envirocheck report and geological maps have been reviewed, the following is a summary of the combined data. The Envirocheck report indicated none of the following within 250 metres:

- Contaminated land register entries
- Pollution incidents
- Water abstraction points or Source protection zones
- Hazardous substances sites
- Sensitive land uses (other than nitrate vulnerable zone)

Geology of Site

The underlying solid rocks are shown as Cheser Formation Sandstone.

Surface drift is shown as alluvium (clay, silt, gravel) and natural subsidence hazards are shown as moderate (compressible ground) to low (running sand) risk.

Surface Water (Hydrology)

The nearest water course is a culvert 82m southwest and the River Irwell is 430m southwest.

The nearest discharge consent is for storm sewage overflow to the River Irwell 149m southwest *

The nearest pollution incident is listed 224m south, a minor incident with unknown pollutant *

The area slopes down to the southwest, the flow of surface water is expected to be in this direction.

* not relevant due to distance/severity/significance

Flooding (General)

Information from the EA flood maps suggests areas where rivers would flood. There are two zones:

- 'normal' flooding, based on a 1 in 100 chance of it happening in any year (1:200 if flooding is from the sea). This is normally closer to the river.
- 'extreme' flooding, further away from the river and having a 1 in 1000 chance.

Flood defences are sometimes shown on the maps and a purple line indicates these; the hatched areas behind show places that are defended up to a 1 in 100 chance.

Flooding can occur for many reasons other than those dealt with by the EA maps. These include:

- burst pipes, blocked drains, sewers and culverts
- inadequate drainage, cloudbursts/flash flooding overwhelming drainage systems

Statements in this report such as 'clear of flooding/flood plain' and 'flooding – no further action' are references to the EA river and sea flood maps and are no guarantee that flooding will not occur.

Groundwater Flooding - Potential for groundwater flooding to occur at the surface.

Flooding from Rivers - The site is shown to be at risk of flooding in 'extreme' conditions, with an area at risk of flooding in 'normal' conditions 25m southwest.

Surface Water Flooding – Shown to be clear of surface water flooding, the nearest being 1 in 1000 year surface water flooding is immediately northwest and 5m south.

Groundwater (Hydrogeology)

The solid rocks under the site are indicated as a Principal aquifer and superficial (drift) deposits are classed as a Secondary A aquifer.

Groundwater flow is likely to follow the topography and move to the southwest.

Landfill Sites

A landfill site is listed 182m southwest, no details are given on waste types or dates of filling.

Filled Ground

Within 250 metres of the site there are the following suspected filled features:

- 18m and 245m northeast
- 168m southeast
- 182m southwest
- 225m northwest

Radon

The site is in a lower probability radon area as less than 1% of homes in the area are above the radon action level. Radon protection measures are not required.

Mining

This is not a coal mining area.

Nearby Industry

There is a PPC listing 240m northwest at a petrol station, which also has a fuel station listing.

There are the following trade directory entries within 50m:

- 28m west – T-shirts – Inactive*
- 51m west – Leisure and sportswear manufacturers and wholesalers – Inactive*
- 31m northwest – Machine tools: manufacturers and distributors – Inactive
- 34m north – Clothing and fabrics: manufacturers – Active*
- 40m north – Hardware – Inactive*
- 40m north – Clothing and fabrics: manufacturers – Inactive*

A fuel station is listed 147m north *

An unspecified factory is shown 93m southwest *

* not relevant due to distance/severity/significance

NEARBY BOREHOLES/PREVIOUS REPORTS/OUTCROPS

The following information, and enclosed borehole logs, contain British Geological Survey materials © NERC (2023). A BGS BH record 58m south shows:

Clay	-	0 – 2.6m
Sand	-	2.6 – 3.45m
Gravel	-	3.45 – 7.0m

A BGS BH record 95m west shows:

Tarmac/fill	-	0 – 1.2m
Silt and sand	-	1.2 – 3m
Sand and gravel-		3 – 8.3m
Sandstone	-	8.3 – 9.0+

SITE HISTORY

Date	On Site	Off Site
1848 (1:10560)	Undeveloped	Probable house immediately northeast. River Irwell 180m southwest
1890 (1:500)	Northeast edge undeveloped, remainder occupied by terraced houses	Row of terraced houses extends to the southwest. Brick works 120m southwest with clay pit 30m east, at a higher level than the site. Probable houses, immediately southeast. Terraced houses immediately northwest and 10m southeast. Engraving works 150m west. Priory 80m northeast.
1908 (1:2500)	Little or no change	House immediately southeast and brickworks 120m southeast demolished. Electricity sub-station 190m east. Pond 115m east in former clay pit.
1922-38	Little or no change	No relevant change.
1948 (1:2500)	Buildings demolished except for single building on northwest boundary.	House immediately southwest demolished, terrace now starts 5m southwest. Houses 10m southeast demolished and ruin 60m southwest. Possible filling in clay pit starts 70m east.
1956 (1:10000)	Site cleared.	Terrace 5m southwest demolished. Prison in former clay pit 70m southeast, linking to main prison 160m southeast
1972-79	Site vacant	Existing building built immediately southwest. Houses immediately northwest demolished. Unclear if clay pit to the east has been filled or is not mapped as the prison building 70m southeast is not mapped.
1985 (1:10000)	Little or no change.	Warehouse immediately northwest Prison not mapped. River Irwell valley 180m southwest filled.
1994 (1:10000)	Little or no change	Warehouse/shop built 10m southeast.
2003 (1:10000)	Little or no change	Prison buildings shown 40m northeast, 35m and 70m southeast about 6m above the site.
2023	Little or no change	No relevant change

DISCUSSION

Site History

The original houses on site, immediately southwest and 10m southeast were demolished during or shortly after WW2, and a ruin is shown about 60m southwest.

Local historical sites suggest there were nearby bomb strikes, and could be the cause of the nearby ruin and house clearances. Bearing in mind the number of nearby bomb strikes, potential for Unexploded Ordnance (UXO) and potential for unexploded, incendiary devices, it is suggested that a UXO report is commissioned prior to any further investigation or construction.

Contamination

The site was originally developed as terraced houses largely demolished on-site by the late 1940s/50s, although those to the southwest remained. There has been no use of the site from which high levels of contaminants would be expected.

Made ground, probably demolition rubble, is expected from the terraced houses, possibly up to 2.5m deep if basements were present. Although this can contain raised levels of contaminants, they would not be expected to exceed commercial thresholds.

Nearby land-uses have been housing, a warehouse, shops and a clay pit/brick works. These are not uses which will pose a risk to a commercial development.

The development will be a commercial storage unit with concrete yard. Potential pollutant linkages are considered to be:

- Sulphate attack on buried concrete.

A very low risk is anticipated.

Controlled Waters

There is an underlying Principal aquifer beneath alluvium, there are no nearby water abstraction points or source protection zone.

The nearest water course is a culvert 82m southwest and the River Irwell is 430m southwest.

On completion, the building and yard will cover the site thereby eliminating the risk of rainwater passing through the surface soils. Furthermore, contamination is not expected at high levels, and it is anticipated there will be no risk to controlled waters.

Landfill Gas/Ground Gas

There is a landfill site 182m southwest, with no details on waste types. A moderate to high gas generation potential is assumed and bearing in mind the distance, a low risk to the site is anticipated.

There is a former clay pit starting about 10m northeast, now occupied by the prison. The findings suggest this was filled, before the prison was built. However, this is above the level of the site and the mapping suggests the base is unlikely to have come down to the same level as the site. Although this is a potential source of ground gases, the findings suggest gases are most likely to migrate upwards to the northeast, rather than down to the site, and a low risk is anticipated at worst.

Radon

Radon protection measures are not required.

Flooding from Rivers

The maps show that this site is clear of flooding from rivers.

The site is shown to be at risk of flooding in 'extreme' conditions, with an area at risk of flooding in 'normal' conditions 25m southwest.

Groundwater and Surface Water Flooding

Shown to be clear of surface water flooding, the nearest being 1 in 1000 year surface water flooding immediately northwest and 5m south.

The site is in an area with potential for groundwater flooding to occur at the surface.

Foundations

It is expected that made ground will be present, with underlying sand, gravel, silt and clay. This can provide variable conditions for foundations and a range of options may need to be considered.

INDUSTRY PROFILE

The site has had no industrial use and the current commercial use is not expected to be a significant source of contaminants. The most likely source of contaminants is expected to be made ground.

Source	Possible Contaminants
Made Ground	Metals: copper, zinc, chromium, nickel, lead, cadmium, arsenic, Inorganic compounds: cyanide, sulphates Phenols Mineral oils, fuel oils (TPHs) Asbestos General hydrocarbons (PAHs)

CONCEPTUAL MODEL

A conceptual model based on the source-pathway-receptor concept is included.

Source	Receptors	Pathway	Potential/Likely Pollutant Linkage
Asbestos	End-users	No pathway	No
	Off-site	Migration off-site	Possible
Inorganic contaminants	End-users	No pathway	No
	Groundwater	Leaching towards	No
	River/stream	Leaching towards	No
Sulphate	Building fabric	Concrete directly in contact with soil	Yes
Hydrocarbons	End-users	No pathway	No
	Service pipes	No new water pipes	No
	Groundwater	Leaching towards	No
	River/stream	Leaching towards	No
Hydrocarbon vapours	End-users	Inhalation of vapours indoors and outdoors	No
Landfill gas	End-users (inside)	Seeping into buildings, explosion, asphyxiation	Yes
Radon	End-users (inside)	Seeping into buildings	No

CONCLUSION

Bearing in mind the number of nearby bomb strikes, potential for Unexploded Ordnance (UXO) and potential for unexploded, incendiary devices, it is recommended that a UXO report is commissioned.

This should be carried out prior to any subsequent intrusive investigations or construction.

Contamination

Taking into account the past use of the site it is thought likely that contamination will be present on the site, however, high levels are not expected and these are unlikely to pose a significant risk to a commercial development.

A limited intrusive investigation is required, consisting of boreholes and tests to confirm the presence/absence and extent of contamination on the site. This will also help classify soils for disposal off-site and design buried concrete. There are no specific point sources for contamination.

Controlled Waters

No risk to controlled water is expected and no further action is considered necessary at this stage. This may need to be reviewed following the soil tests.

Landfill Gas/Ground Gas

There is a nearby landfill and large area of probable filled ground.

A low risk is anticipated and a gas testing programme is required.

Radon

Radon protection measures are not required.

Flooding

The site is shown to be at risk of flooding in 'extreme' conditions, with an area at risk of flooding in 'normal' conditions 25m southwest.

The site is also shown to be clear of surface water flooding, the nearest being 1 in 1000 year surface water flooding immediately northwest and 5m south.

These maps are fairly crude and it is beyond the scope of this report to provide a comprehensive flood risk assessment. For greater confidence a detailed flood risk assessment should be obtained.

Foundations

A series of boreholes are required in the area of the proposed building to allow the most suitable foundations to be designed.

Yours faithfully

1. This report should be considered in relation to the objectives agreed between Worms Eye and the Client, outlined in the introduction.
2. For the work, reliance has been placed on publicly available data, obtained from the sources identified in the report. The information is not exhaustive and further information may be available from other sources. When using the information it has been assumed it is correct, and no attempt has been made to verify the information.
3. This report has been produced in accordance with current UK policy and guidelines, for land and groundwater contamination, enforced by the Local Authority and the Environment Agency.
4. During the site walkover, reasonable effort was made to obtain an overview of the site. However, no attempt was made to enter areas that are unsafe, a risk to health and safety, locked, barricaded, overgrown, or areas not made accessible.
5. Access, the presence of services and activities on the site, limited locations where sampling could be carried out and the techniques that could be used.
6. Assessments are based on available information at the time of writing and are ultimately for the decision of the regulatory authorities.
7. The conclusions and recommendations provide an overview and guidance only and should not be specifically relied upon without considering the context of the report in full.
8. Worms Eye cannot be held responsible for any use of the report or its contents for any purpose other than that for which it was prepared. The copyright of this report, and other plans or documents prepared by Worms Eye, is owned by them, and no such plans or documents may be reproduced, published or adapted without written consent. Complete copies may be made and distributed by the client, as expected, in dealing with matters related to its commission. Should the client pass copies of the report to other parties for information, the whole report should be copied, but no professional liability, or warranties, shall be extended to other parties by Worms Eye, without their written agreement.
9. New information, revised practices, or changes in legislation, may necessitate the re-interpretation of the report, in whole or in part.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client. In this datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

10k Raster Mapping
Published 1999
Source map scale - 1:10,000

The historical maps shown were produced from the Ordnance Survey's 1:10,000 colour raster mapping. These maps are derived from Landplan which replaced the old 1:10,000 maps originally published in 1970. The data is highly detailed showing buildings, fences and field boundaries as well as all roads, tracks and paths. Road names are also included together with the relevant road number and classification. Boundary information depiction includes county, unitary authority, district, civil parish and constituency.

VectorMap Local

Published 2023

Source map scale - 1:10,000

VectorMap Local (Raster) is Ordnance Survey's highest detailed 'backdrop' mapping product. These maps are produced from OS's VectorMap Local, a simple vector dataset at a nominal scale of 1:10,000, covering the whole of Great Britain, that has been designed for creating graphical mapping. OS VectorMap Local is derived from large-scale information surveyed at 1:1250 scale (covering major towns and cities), 1:2500 scale (smaller towns, villages and developed rural areas), and 1:10 000 scale (mountain, moorland and river estuary areas).

Source map scale - 1:1,056

The 1:1056 scale of Ordnance Survey mapping was adopted from Ireland in 1848 and was used to survey towns with a population of over 4000, plus county towns of lesser population, in those counties mapped at the six-inch scale in 1841-55. The scale was the largest scale at which London was mapped by the Ordnance Survey and a 'skeleton' survey of the capital, showing little more than streets, street names, frontages and altitudes, was undertaken between 1848 and 1850. The majority of the 1:1056 surveys were later replaced by 1:500 surveys; although almost all the remainder were revised at this scale, sometimes more than once before 1895. The type of detail shown on the 1:1056 scale is broadly similar to that on 1:500; the apparent omission of minor details such as sewer access points and street lights may be as much a reflection of the generally earlier date of these plans, as of the specification of the map.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

Lancashire And Furness

Published 1890 - 1891

Source map scale - 1:500

The 1:500 scale Ordnance Survey mapping was introduced in 1855 as a replacement for the 1:528 scale and to complement the 1:2500 scale that had been implemented in 1853. By 1895, the 1:500 scale covered most towns over a population of about 4000 at the time of survey, although very few towns were mapped more than once at this scale, and none have been since 1910. The 1:500 scale gives particular emphasis to such features as lamp posts, man holes, arched passages and minor building projections. Also often featured are divisions between tenements, interior ground floor layouts of public buildings, and on earlier plans, the functions of the various parts of larger industrial premises are also indicated. Content of the plans does vary however, from one town to the next in terms of, for example, the completeness of railway tracks and the coverage of public buildings.

Please note: Due to the partial coverage of Historical Town Plans, it is possible that not all segments within an order will contain mapping. Only the segments that have Town Plan coverage will be generated.

Lancashire And Furness

Published 1892 - 1893

Source map scale - 1:2,500

The historical maps shown were reproduced from maps predominantly held at the scale adopted for England, Wales and Scotland in the 1840's. In 1854 the 1:2,500 scale was adopted for mapping urban areas and by 1896 it covered the whole of what were considered to be the cultivated parts of Great Britain. The published date given below is often some years later than the surveyed date. Before 1938, all OS maps were based on the Cassini Projection, with independent surveys of a single county or group of counties, giving rise to significant inaccuracies in outlying areas.

Large-Scale National Grid Data

Published 1992

Source map scale - 1:1,250

'Large Scale National Grid Data' superseded SIM cards (Ordnance Survey's 'Survey of Information on Microfilm') in 1992, and continued to be produced until 1999. These maps were the fore-runners of digital mapping and so provide detailed information on houses and roads, but tend to show less topographic features such as vegetation. These maps were produced at both 1:2,500 and 1:1,250 scales.

Site is a concrete surfaced yard, next to a shop, formerly occupied by terraced houses.

Made ground is expected.

Possible contaminants: Heavy metals, Sulphate, Asbestos, TPHs, PAHs and Phenols.

Very low risk from contaminants anticipated.

No risk to controlled waters likely.

Low gas risk expected.

Radon protection not required.
