

Sieman's Downdraft - Noiseless extraction - ***(high end, attractive glass and stainless steel extractor fan)***

The downdraftAir system is as stylish as functional. This hood only appears when it is required, when it is not in use it is hidden away in the kitchen counter behind the hob. Making this hood the perfect alternative to the more classic-looking extractor hood, with the added advantage of disappearing when not being used. These come as clear glass or black glass.

Space-saving installation: allowing greater use of the space under your worktop.

LED lights for optimal visibility and ambience for a fuller cooking experience.

TouchControl: easily and quickly manage the LED light and power levels

Intensive setting with automatic revert for a peak performance

An impressive extraction rate of 750 m3/h due to the high-performance motor - quickly and effectively clearing the air from your kitchen.
