Subject: Fw: 136291/FO/2023 - 100 Ogden Lane Manchester M11 1NG

Dear Kanadi,

I have been advised that whilst your client has a leasehold interest in the land to be used for car parking, the freehold interest remains with the City Council.

The required notice has not been served on the City Council.

The planning application is therefore invalid.

If the planning application is to progress Notice No 1 will need to be served on the following:

Capital Programmes and Procurement, Corporate Core Directorate
PO Box 532, Town Hall
Manchester
M60 2LA

Certificate B within the attached application forms will also need to be completed and returned.

I look forward to hearing from you.

Yours sincerely,

Carl

Subject: Fw: 136291/FO/2023 - 100 Ogden Lane Manchester M11 1NG

Dear Kanadi,

I have reviewed that the submitted land registry information that indicates your client's leasehold interests.

However, the freehold interest has not been demonstrated through the submitted details.

I will discuss with colleagues with access to local authority records to determine, if the council maintains a freehold interest in the land.

You may also wish to undertake your own Land Registry checks.

The freehold interest will need to be established as appropriate notice has to be served (on the freeholder) and Certificate B completed.

I look forward to hearing from you.

Yours sincerely,

Carl

Subject: Re: 136291/FO/2023 - 100 Ogden Lane Manchester M11 1NG

Dear Kanadi,

Thank you for your email clarifying details of the site ownership.

As the leasehold relating to the land has been agreed it may not be appropriate for the issue of stopping up of the land to be revisited at this stage. However, I have asked Highways to advise further on this issue.

There is concern regarding the amount and configuration of proposed car parking. it is recommended that two car parking spaces be provided. Appropriate gates and boundary treatment be should also provided to Ogden Lane and to demarcate the proposed amenity area.

Please also consider and respond to the requests set out below relating to waste management, the provision of secured cycle storage and an electric vehicle charging point.

I look forward to hearing from you.

Yours sincerely,

Carl

Hi Carl,

Please find attached the Title Deed showing that the proposed parking area is within the ownership of the applicant.

Could clarify this with highways and let me know.

Thank you.

Dear Kanadi,

I write with regarding to the above and to advise you of consultation comments as set out below.

I have reviewed Highways comments regarding the inclusion of part of the adopted highway within the red edge identifying the application site, i.e., the area to the west of the site to be used for car parking and an amenity area. This land forms part of the adopted highway and is therefore outside your client's ownership. The required service of notice on the City Council has not been undertaken and the planning application is therefore invalid. It will be necessary to complete and submit Certificate B on the planning application forms following the service of Notice No 1 on the following:

Head of Network Management (Highways)
Manchester City Council
The Highways Service, PO Box 532, Town Hall, Manchester, M60 2LA.

Head of Development & Investment Estate Development Team
Manchester City Council
Growth & Development
Level 8 Town Hall Extension, Manchester, M2 5DB.

It is also advised that the Development Team be contacted to discuss the use of Council owned land as part of the proposed development. If the land cannot be acquired, it will not be possible to deliver the proposed development should planning permission be granted. Significant changes to the proposal would also be required.

I have attached a copy of the application form that includes Certificate B and Notice No 1 that needs to be served on each of the above.

Your client may wish to withdraw the planning application so that discussion can be undertaken to determine the extent of the proposed development site and to establish land ownership details.

If your client has any further information relating to the ownership of this land, please submit it for consideration.

I look forward to receiving your comments and advice regarding how your client wishes to proceed with the planning application.

Yours sincerely,

Carl.

Consultation responses

1. Highways

1.1 The pedestrian access points will remain as existing, this is acceptable to Highways.

An existing parking area is situated to the side of the property which is accessed via an existing vehicular access point from Ogden Lane. There are no amendments noted regarding the vehicular access.

1.2 However, Council records indicate that the proposed parking area is on the adopted highway. A stopping up order would be needed to extinguish existing highway rights through a S247 agreement at the applicant's expense and would need discussion with the appropriate Council department. Where there is a requirement to stop up or divert an existing section of highway or footpath (under either a S116 Highways Act 1980 or S247/S257 Town and Country Planning Act 1990) a discussion should be undertaken with the Statutory Approvals Team, so an appropriate process can be determined and taken forward, at the applicant's expense. Details can be accessed via the following link:

<https://www.manchester.gov.uk/xfp/form/1943>

1.3 The applicant should confirm that they have landowner agreement for the use of the land as part of the development.

1.4 The length of the driveway should be confirmed to ensure that vehicles do not overhang the footway, i.e., each driveway space should provide a minimum of 3.0m x 6.0m. The applicant should provide verification that the necessary vehicle manoeuvres can be undertaken at the entry / exit point, as well as access/egress the spaces suitably, through the provision of vehicle swept path information. Highways would not accept the need for vehicles to reverse on to the highway.

[Given these comments the amount and configuration of the car parking spaces will need to be reviewed.]

1.5 100% cycle parking is required in a secure and sheltered location within the site.

1.6 No boundary treatments are proposed. The applicant should be advised that any boundary treatments to the adopted highway should retain visibility from a height of 600 mm upwards in order to protect sight lines. All gating which is accessed from the highway must be inward opening, in order to prevent obstruction to passing footway users.

1.7 It is acceptable for waste bins to be stored within the curtilage of the property and serviced via existing operations. However, the distance from the bin stores to the collection point must be clarified and accordance with GD04 guidelines.

1.8 Detail should be sought from the applicant in relation to any proposed construction or fitout arrangements, where there is an impact on the highway. The applicant should be advised that any requirements for licensing, hoarding / scaffolding, skips and any associated temporary traffic management arrangements will need discussion and agreement with the council's Highway Applications and Network Resilience teams via email:

highwaylicences@manchester.gov.uk

2. Environmental Health

2.1 The following acoustic insulation condition is required:

a) Before the occupation of the development, a scheme for acoustically insulating the proposed residential accommodation against noise from Ogden Lane and any other identified noise source shall be submitted to and approved in writing by the City Council as local planning authority. The approved noise insulation and ventilation scheme shall be implemented before the occupation of the development.

b) Prior to first occupation of the residential units, a verification report shall be required to validate that the work undertaken throughout the development conforms to the recommendations and requirements in the approved acoustic consultant's report. The report shall also undertake post completion testing to confirm that the internal noise criteria have been met. Any instances of non-conformity with the recommendations in the report shall be detailed along with any measures required to ensure compliance with the internal noise criteria.

Reason: To secure a reduction in noise from traffic or other sources, in order to protect future residents from noise disturbance pursuant to policies SP1 and DM1 of the Core Strategy for the City of Manchester and saved policy DC26 of the Unitary Development Plan.

2.2 The waste and recycling management details should be supplemented with the following:

- i. Estimated volumes and types of waste produced by the development;
- ii. Details of internal and external stores for both waste and recycling, including any plans and designs;
- iii. Location of the proposed collection point and details of the route the collection vehicle will take;
- iv. Details of how waste will be transferred between stores and to the collection location;
- v. Details of number and capacity of bins proposed and collection frequency. Please refer to guidance at: http://www.manchester.gov.uk/downloads/download/6048/waste_management_strategy.

2.3 The following condition is required maintain air quality and endure the delivery of EV charging points

Prior to occupation of the development, a scheme for electric vehicle charging shall be submitted to and approved in writing by the City Council as local planning authority. The approved scheme shall be implemented before the occupation of the development and maintained in situ at all time s thereafter.

*Reason: To secure a reduction in air pollution from traffic or other sources, in order to protect existing and future residents from air pollution, pursuant to policies EN16, SP1 and DM1 of the Core Strategy for the City of Manchester. **

* The developer should refer to MCC's AQ Guidance Note for EV charge point recommendations,

2.4 Informative: Contaminated land watching brief – Should ground and / or groundwater contamination and/or ground gas be encountered on the site before the development is occupied, the developer is advised to cease works and call Contact Manchester on 0161 234 5004 or email contact@manchester.gov.uk for advice regarding how to proceed.

3. **GM Police Design of Security** – The following recommendations have been received:

3.1 The windows on the front elevation are positioned directly adjacent to the public footway which could leave them vulnerable. It is highly recommended that these windows are protected by ornamental metal bars to the lower half or a perforated screen.

3.2 Changes to the building should accord with Secured by Design standards.
