Hi Michael,

As discussed, the strip out of the old services and routing of the new services within the suites has concluded that there is no impact on historic fabric, either the unistrut being fixed into modern plasterboard or modern timber sub-frame / tongue and groove boards, and utilising the existing openings for services. As per the attached photo, highlighting the dropped ceiling within the units.

As we are in the situation that no historic fabric is to be affected, can you please let us know whether we need to submit anything further, as we have previously ignored conditions where they are not required. Please let us know if you need anything further.

Many Thanks

Declan Cahill
