Pod Point App and the Pod Point Network

To get the most out of your electric car experience, you can use your Pod Point Solo charger with the Pod Point App and the Pod Point Network.

With the Pod Point App, you can track costs and energy usage at home, use charging bays across the Pod Point Network and access your company's chargers too. [Find out more and get the Pod Point App.](#)

With the Pod Point Network, you can start charging instantly with no subscription fees at more than 3,000 bays on the public EV charging network. [Discover the Pod Point Network.](#)

Pod Point is part of our EDF family

Pod Point joined us in 2020. As the leading UK home charging provider, Pod Point offers chargers for home and business, and access to more than 3,000 charging bays across the UK.

Our joint goal is to put an electric vehicle charge point everywhere you need to park.

Your guide to electric car home charger installation

Cookies on our website

We use cookies across our website to ensure that you get the best experience. If you continue without changing your settings, we'll assume that you are happy to receive all cookies on

Dedicated off-street parking,

Wi-Fi connection at your property or a SIM router with a 3G or 4G SIM (for Pod Point home chargers),

Permission from your landlord (if you're renting),

Home in mainland Great Britain.

What's included in home installation?

Fitting of your home charger on a brick or plaster wall, or to another suitable permanent structure.

Up to 15 metres of cable, neatly clipped to the wall. It will run between your electricity supply meter, main distribution board and your home charger.

An electrical certificate to show your installation meets the [18th Edition IET Wiring Regulations](#) – the UK standard.

[Read the full list of what's included in a standard installation and what happens if extra work is needed.](#)
