Consultations & Notification Responses

None Required - There is no statutory requirement to consult third parties including neighbours; views expressed by third parties on the planning merits of the case, or on whether the applicant has any private rights to carry out the operation, use or activity in question, are irrelevant when determining the application.

Issues

Sections 191 and 192 of the Town and Country Planning Act 1990 provide for anyone (not just a person with a legal interest in the land) to apply to the local planning authority (LPA) for a lawful development certificate (LDC). A certificate is a statutory document certifying:

(1) in the case of an application under section 191, the lawfulness, for planning purposes, of existing operations on, or use of land, or some activity being carried out in breach of a planning condition; or

(2) in the case of an application under section 192, the lawfulness of proposed operations on, or use of land.

The onus of proof in regard to (1) is firmly on the applicant and the issue of a certificate will depend on the on factual evidence provided about the history and planning status of the building or other land and the interpretation of any relevant planning law or judicial authority. The relevant test of the evidence in this matter is “the balance of probability” and the applicants own evidence does not need to be corroborated by independent evidence. If the LPA have no evidence to contradict the applicants version of events or make them less then probable, there is no good reason to refuse the issue of a certificate.

In regard to (2), this provides that, if the LPA are supplied with information satisfying them that the use or operations described in the application would be lawful, if instituted or begun at the time of the application, they shall issue a certificate to that effect; and, in any other case, they shall refuse the application.

In short, the purpose section 192 is to enable any person who wishes to find out whether any proposed use or operations would be lawful to apply to the LPA for that purpose

The application needs to describe the proposal with sufficient clarity and precision to enable the LPA to understand (from a written description and plans) exactly what is involved in the proposal; and to submit whatever supporting information or legal submission that are to be relied upon in order to satisfy the LPA that a certificate should be granted for the proposal.

In making their decision on an application under section 192, the LPA ask themselves the hypothetical question - *"If this proposed change of use had already occurred, or if this proposed operation had commenced, on the application date, would it have been lawful for planning purposes?"* In doing so, the LPA will not only consider whether the proposal would involve "development" requiring an application for planning permission, but whether it would involve a breach of any existing condition or limitation imposed on a grant of planning permission which has been acted upon, and which therefore constrains what can be done on the land. The LPA will not make a proposal fit a scenario; the only question is whether the proposal made by the applicant is lawful at the time of submission.

The Application

This application is pursued under subsection (1) of section 192, which provides for an application to determine whether any proposed use or operations would be lawful for planning purposes.

The applicant is seeking a certificate of proposed lawful development for a single storey rear extension and installation of rear dormer.

- The single storey rear extension will be considered under Class A; and,

- The dormer will be considered under Class B;

Single Storey Rear Extension

Under Class A for *"the enlargement, improvement or other alterations of a dwellinghouse"* the status of the original house needs to be taken into account, as this state the base from which all measurements should be taken. Under the Order, the term "original" means:

in relation to a building existing on 1st July 1948, as existing on that date and, in relation to a building built on or after 1st July 1948, as so built

Interpretation of Class B

B.3 For the purposes of Class B, "resulting roof space" means the roof space as enlarged, taking into account any enlargement to the original roof space, whether permitted by this Class or not.

B.4. For the purposes of paragraph B.2(b)(ii)—
(a) roof tiles, guttering, fascias, barge boards and other minor roof details overhanging the externalwall of the original dwellinghouse are not to be considered part of the enlargement; and
(b) "rear or side extension" includes an original part of, or a subsequent extension of, the dwellinghouse that extends from the rear or side of the principal part of the original dwellinghouse.

Other Legislative Requirements

Equality Act 2010

Section 149 (Public Sector Equality Duty) of the Equality Act 2010 requires due regard to the need to: Eliminate unlawful discrimination, harassment and victimisation and other conduct prohibited by the Act and; Advance equality of opportunity between persons who share a protected characteristic and persons who do not share it. The Equality Duty does not impose a legal requirement to conduct an Equality Impact Assessment. Compliance with the Equality Duty involves consciously thinking about the aims of the Equality Duty as part of the process of decision-making.

Human Rights Act 1998 considerations

This application needs to be considered against the provisions of the Human Rights Act 1998. Under Article 6, the applicants (and those third parties, including local residents, who have made representations) have a right to a fair hearing and to this end the local planning authority must give full consideration to their comments.

Protocol 1 Article 1, and Article 8 where appropriate, confer(s) a right of respect for a person's home, other land and business assets. In taking account of all material considerations, including Council policy as set out in the Core Strategy and saved polices of the Unitary Development Plan, the Director of Planning, Building Control & Licensing has concluded that some rights conferred by these articles on the applicant(s)/objector(s)/resident(s) and other occupiers and

owners of nearby land that might be affected may be interfered with but that that interference is in accordance with the law and justified by being in the public interest and on the basis of the planning merits of the development proposal. She believes that any restriction on these rights posed by the recommendation given is proportionate to the wider benefits of and that such a decision falls within the margin of discretion afforded to the Council under the Town and Country Planning Acts.

Recommendation: Grant

Condition(s) to be attached to decision for approval OR Reasons for recommendation to refuse

Grant on the basis that the proposed single storey rear extension and rear dormer as shown on drawing no.02 does constitute permitted development as it would meet the requirements of Part 1, Schedule 2, Classes A and B of the Town and Country Planning (General Permitted Development) (England) Order 2015 (as amended).
