Dear Sir/Madam,

Pre-Commencement Conditions

Application number: 135649/FO/2022

Ashton Old Road, Openshaw, Manchester, M11 2FY

In accordance with s100ZA of the Town & Country Planning Act 1990 (as amended), this letter gives notice of the requirement to place pre-commencement condition(s) on any permission arising from the above application.

The required condition(s), and the reason(s) for them are as follows:

Prior to the commencement of the development, a detailed construction management plan outlining working practices during development shall be submitted to and approved in writing by the local planning authority, which for the avoidance of doubt should include;

- o The routing of construction traffic;
- o Detail the vehicular activity associated with the construction including appropriate swept path assessment;
- o Details of the location and arrangements for contractor parking;
- o The identification of the vehicular access points into the site;
- o Identify measures to control dust and mud, including on the surrounding public highway including: details of how the wheels of contractor's vehicles are to be cleaned during the construction period;
- o The details of an emergency telephone contact number for the site contractor to be displayed in a publicly accessible location;
- o A highway dilapidation survey including photographs and commentary on the condition of carriageway/footways on construction vehicle routes surrounding the site.
- o Identify measures to reduce noise emissions;
- o Compound locations where relevant;

Development shall be carried out in accordance with the approved construction management plan.

Reason - To safeguard the amenities of nearby residents and highway safety pursuant to policies SP1, EN9, EN19 and DM1 of the Manchester Core Strategy (2012).

No development shall take place until surface water drainage works, designed in accordance with Non-Statutory Technical Standards for Sustainable Drainage Systems

(March 2015) or any subsequent replacement national standards, have been submitted to and approved in writing by the Local Planning Authority. The development shall be implemented in accordance with the approved details.

Reason - To promote sustainable development, secure proper drainage and to manage the risk of flooding and pollution, pursuant national policies within the NPPF and NPPG and policies EN08 and EN14 of the Manchester Core Strategy (2012).

a) Before the development hereby approved commences, a report (the Preliminary Risk Assessment) to identify and evaluate all potential sources and impacts of any ground contamination, groundwater contamination and/or ground gas relevant to the site shall be submitted to and approved in writing by the City Council as local planning authority. The Preliminary Risk Assessment shall conform to City Council's current guidance document (Planning Guidance in Relation to Ground Contamination).

In the event of the Preliminary Risk Assessment identifying risks which in the written opinion of the Local Planning Authority require further investigation, the development shall not commence until a scheme for the investigation of the site and the identification of remediation measures (the Site Investigation Proposal) has been submitted to and approved in writing by the City Council as local planning authority.

The measures for investigating the site identified in the Site Investigation Proposal shall be carried out, before the development commences and a report prepared outlining what measures, if any, are required to remediate the land (the Site Investigation Report and/or Remediation Strategy) which shall be submitted to and approved in writing by the City Council as local planning authority.

b) When the development commences, the development shall be carried out in accordance with the previously agreed Remediation Strategy and a Completion/Verification Report shall be submitted to and approved in writing by the City Council as local planning authority.

In the event that ground contamination, groundwater contamination and/or ground gas, not previously identified, are found to be present on the site at any time before the development is occupied, then development shall cease and/or the development shall not be occupied until, a report outlining what measures, if any, are required to remediate the land (the Revised Remediation Strategy) is submitted to and approved in writing by the City Council as local planning authority and the development shall be carried out in accordance with the Revised Remediation Strategy, which shall take precedence over any Remediation Strategy or earlier Revised Remediation Strategy.

Reason - To ensure that the presence of or the potential for any contaminated land and/or groundwater is detected and appropriate remedial action is taken in the interests of public safety, pursuant to policies DM1 and EN18 of the Manchester Core Strategy (2012).

Please confirm your agreement to the above conditions within 10 working days. If we do not hear from you within this period, we will impose the conditions on any permission. Please note that this information is provided without prejudice to any final decision in relation to this application.

If you would like any further information about this letter, please contact Ian Jarvis using the above details. Please quote the above reference number on any further correspondence.

Yours faithfully,

A handwritten signature in black ink, appearing to read 'Julie Roscoe', with a stylized, cursive script.
