

view from rear of property

existing interface

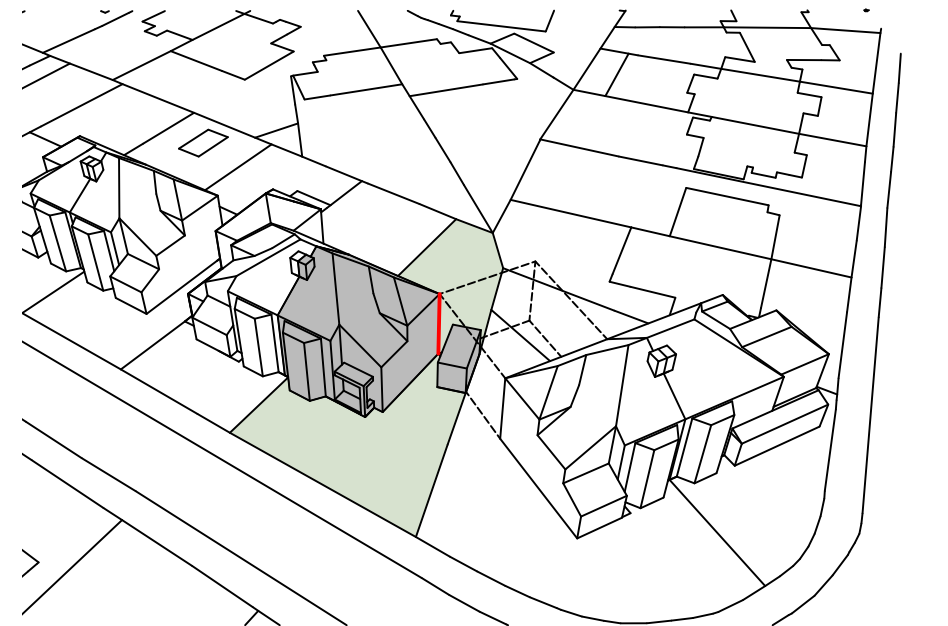

The rear elevation at no 32. has an outlook towards the side of the applicant site at no 34. Currently the upper level bedroom window has an interface of 7.5m between the upper level window and the rear corner of no 34.

proposed interface

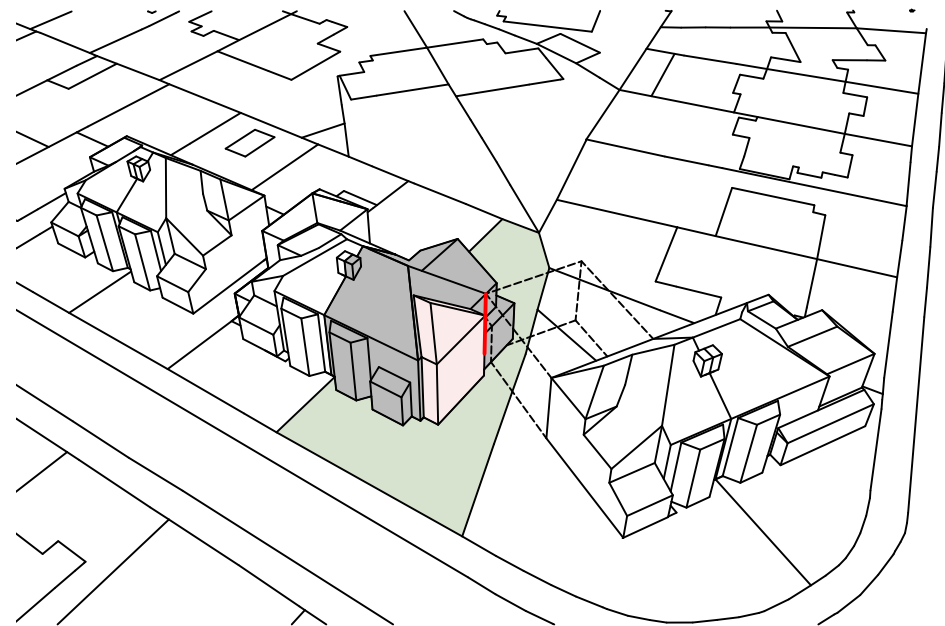

The proposal shows that the current interface from 1st floor windows @ no.32 will not be impacted or reduced by the new extension to no.34. The 2 storey section to the side has been carefully positioned to ensure that this interface is not reduced.
