

MSV Housing CSCS & Employability Workshop October 2022

GMI supports group of unemployed young people, aged 17-19, on their journey into the Construction Industry.

As part of a fledgling relationship between GMI and Mosscafe St Vincents Housing Association, Responsible Business Partner Daniel Proffitt was invited to the Positive Futures Building in Moss Side to meet with a group of learners who were completing a Health and Safety qualification with the aim of entering the Construction Industry.

Daniel joined Iain McGowan from Southway Housing to deliver a CV and Interview session that focused specifically on the construction industry following on from the previous day when the participants completed their Level 1 Health and Safety training.

The group of 8 local young people were all NEET (Not in Employment, Education or Training) and came completely voluntary, showcasing their desire to find work. They worked through what a great CV contains and how they could be successful at an interview. Daniel then highlighted how GMI could support their progress into employment and what projects they could find themselves working on.

Natalie Samuels organiser and Skills & Employment Officer for MSV Housing said:

“Having Daniel from GMI here on the second day really gave our learners some extra motivation. Receiving positive feedback and insider knowledge from a prospective employer is massive to them. We can’t wait to see how this relationship progresses as today was such a good start”.
